IRELAND

The Report referred to in Article 9 of Directive 2003/99/EC

TRENDS AND SOURCES OF ZOONOSES AND ZOONOTIC AGENTS IN HUMANS, FOODSTUFFS, ANIMALS AND FEEDINGSTUFFS

including information on foodborne outbreaks, antimicrobial resistance in zoonotic agents and some pathogenic microbiological agents.

IN 2012
INFORMATION ON THE REPORTING AND MONITORING SYSTEM

Country: Ireland  
Reporting Year: 2012

PREFACE

This report is submitted to the European Commission in accordance with Article 9 of Council Directive 2003/99/EC*. The information has also been forwarded to the European Food Safety Authority (EFSA).

The report contains information on trends and sources of zoonoses and zoonotic agents in Ireland during the year 2012.

The information covers the occurrence of these diseases and agents in humans, animals, foodstuffs and in some cases also in feedingstuffs. In addition the report includes data on antimicrobial resistance in some zoonotic agents and commensal bacteria as well as information on epidemiological investigations of foodborne outbreaks. Complementary data on susceptible animal populations in the country is also given. The information given covers both zoonoses that are important for the public health in the whole European Community as well as zoonoses, which are relevant on the basis of the national epidemiological situation.

The report describes the monitoring systems in place and the prevention and control strategies applied in the country. For some zoonoses this monitoring is based on legal requirements laid down by the Community Legislation, while for the other zoonoses national approaches are applied.

The report presents the results of the examinations carried out in the reporting year. A national evaluation of the epidemiological situation, with special reference to trends and sources of zoonotic infections, is given. Whenever possible, the relevance of findings in foodstuffs and animals to zoonoses cases in humans is evaluated.

The information covered by this report is used in the annual Community Summary Report on zoonoses that is published each year by EFSA.

Ireland - 2012 Report on trends and sources of zoonoses

List of Contents

1 ANIMAL POPULATIONS 1

2 INFORMATION ON SPECIFIC ZOONOSES AND ZOONOTIC AGENTS 4

2.1 SALMONELLOSIS 5

2.1.1 General evaluation of the national situation 5
2.1.2 Salmonella in foodstuffs 5
2.1.3 Salmonella in animals 792
2.1.4 Salmonella in feedingstuffs 800
2.1.5 Salmonella serovars and phagetype distribution 806
2.1.6 Antimicrobial resistance in Salmonella isolates 813

2.2 CAMPYLOBACTERIOSIS 1079

2.2.1 General evaluation of the national situation 1079
2.2.2 Campylobacter in foodstuffs 1079
2.2.3 Campylobacter in animals 1218
2.2.4 Antimicrobial resistance in Campylobacter isolates 1220

2.3 LISTERIOSIS 1226

2.3.1 General evaluation of the national situation 1226
2.3.2 Listeria in foodstuffs 1226
2.3.3 Listeria in animals 1518

2.4 E. COLI INFECTIONS 1519

2.4.1 General evaluation of the national situation 1519
2.4.2 Escherichia coli, pathogenic in foodstuffs 1519
2.4.3 Antimicrobial resistance in Escherichia coli, pathogenic isolates 1708

2.5 TUBERCULOSIS, MYCOBACTERIAL DISEASES 1711

2.5.1 General evaluation of the national situation 1711
2.5.2 Mycobacterium in animals 1711

2.6 BRUCELLOSIS 1714

2.6.1 General evaluation of the national situation 1714
2.6.2 Brucella in animals 1714

2.7 YERSINIOSIS 1717

2.7.1 General evaluation of the national situation 1717
2.7.2 Yersinia in animals 1717

2.8 TRICHINELLOSIS 1719

2.8.1 General evaluation of the national situation 1719
2.8.2 Trichinella in animals 1719

2.9 ECHINOCOCCOSIS 1720

2.9.1 General evaluation of the national situation 1720

2.10 TOXOPLASMOSIS 1720

2.10.1 General evaluation of the national situation 1720
2.10.2 Toxoplasma in animals 1720

2.11 RABIES 1722
2.11.1 General evaluation of the national situation 1722

2.12 STAPHYLOCOCCUS INFECTION 1722
   2.12.1 General evaluation of the national situation 1722
   2.12.2 Staphylococcus in animals 1722

2.13 ENTEROCOCCUS INFECTION 1724
   2.13.1 General evaluation of the national situation 1724
   2.13.2 Antimicrobial resistance in Enterococcus, pathogenic isolates 1724

2.14 Q-FEVER 1726
   2.14.1 General evaluation of the national situation 1726
   2.14.2 Coxiella (Q-fever) in animals 1726

2.15 WEST NILE VIRUS INFECTIONS 1727
   2.15.1 General evaluation of the national situation 1727

3 INFORMATION ON SPECIFIC INDICATORS OF ANTIMICROBIAL 1728

3.1 ESCHERICHIA COLI, NON-PATHOGENIC 1729
   3.1.1 General evaluation of the national situation 1729
   3.1.2 Antimicrobial resistance in Escherichia coli, non-pathogenic 1729

3.2 ENTEROCOCCUS, NON-PATHOGENIC 1733
   3.2.1 General evaluation of the national situation 1733
   3.2.2 Antimicrobial resistance in Enterococcus, non-pathogenic isolates 1733

4 INFORMATION ON SPECIFIC MICROBIOLOGICAL AGENTS 1740

4.1 CRONOBACTER 1741
   4.1.1 General evaluation of the national situation 1741
   4.1.2 Cronobacter in foodstuffs 1741

4.2 HISTAMINE 1742
   4.2.1 General evaluation of the national situation 1742
   4.2.2 Histamine in foodstuffs 1742

4.3 STAPHYLOCOCCAL ENTEROTOXINS 1747
   4.3.1 General evaluation of the national situation 1747
   4.3.2 Staphylococcal enterotoxins in foodstuffs 1747

5 FOODBORNE OUTBREAKS 1749
1. ANIMAL POPULATIONS

The relevance of the findings on zoonoses and zoonotic agents has to be related to the size and nature of the animal population in the country.

</tbody>
</table>
Zoonoses are diseases or infections, which are naturally transmissible directly or indirectly between animals and humans. Foodstuffs serve often as vehicles of zoonotic infections. Zoonotic agents cover viruses, bacteria, fungi, parasites or other biological entities that are likely to cause zoonoses.
