

# Stacked Events not from Conventional Crossing Comments from Consultation

**Howard Davies**

**GMO Panel**

Brussels, March 31<sup>st</sup> 2011

# Comparators- alternative stacking approaches

Azadi et al 2010  
7 enzymes co expressed

ILVO  
Papzova et al (Co-Extra)

- Linked or unlinked events-how to prove?
- Issues surrounding use of GM as a primary comparator
- All GMOs, however produced, are best assessed with a non-GM comparator
- Multigene cassettes- still need to consider loss of specific traits
