

# Questions and answers

5 May 2015

## OVERVIEW

# 80 questions/comments

- ~50% renewal/re-evaluation/flavourings
- ~15% out of EFSA's (FEEDAP) remit
- ~10% risk management
- Grouped by topic
  
- If a question you asked is not addressed, please ask!

# TOLERANCE STUDIES

- Number of replicates
- Mixed sexes
- Need for tolerance studies for new compounds

## EFFICACY

# Meta-analysis

- Guidance on tolerance/efficacy
  - >3 studies
  - Similar protocol
  - Homogeneity testing
  - $P \leq 0.05$

## EFFICACY

- Alternative studies (e.g., *ex-vivo*, *in vitro*)
- Effects on the environment
- Antioxidant claims for trace element
- Sensitivity tests coccidiostats (1 or 2 yr)

## PETS AND NON FOOD-PRODUCING ANIMALS

### Tolerance studies

1. Check need tolerance – relevant guidance
2. Exclusions
  - Ornamental fish/birds – salmonids/major poultry
  - All pets - 3 major species
3. Cats and dogs specific studies
4. Others: 3 species/laboratory animals

# MYCOTOXIN DETOXIFYING AGENTS

- Zootechnical like approach for a technological additive?
- Update of guidance?
