An EFSA Colloquium is NOT:

- An attempt to agree on the details of a preferred strategy
- An exercise to define a blue print for the work ahead of us
- A “who is right - who is wrong” discussion

Instead a EFSA Colloquium is:

- Platform for in-depth discussions on scientific approaches, methods available, and tools and data needed for conducting risk assessment
- Event to explore opportunities and limitations
- Opportunity to identify further (research) needs
- Interactive !!!

Thank you for participating

Wishing you
frank
open and
constructive discussions
