

Yes, we grant!

Are you working at one of the **Article 36 organisations**? EFSA awards grants to competent organisations designated by Member States. Check out the available grants listed below.

EFSA's main grant types

Specific grants		Provide EFSA with access to specific expertise in competent Member States organisations. Example <i>Genotoxicity studies to refine risk assessment.</i>	Implementing distinct projects
Tasking grants		Allow direct scientific and technical support from Member States organisations. Example <i>Support in assessing large volumes of pesticide dossiers.</i>	Receiving direct support
Framework Partnership Agreements (FPA)		Establish long-term partnerships with organisations for recurring scientific and technical support or novel project. Example <i>Risk characterisation of ciguatoxin poisoning by 14 organisations from 6 Member States and EFSA.</i>	Creating long-term partnerships
Thematic grants		Enable innovative scientific cooperation between Member States organisations by creating consortia. Example <i>Develop new methodologies for the identification of emerging risks.</i>	Encouraging innovation
Fellowship grants		Allow future risk assessment experts to train at hosting sites in different Member States. Example <i>Train a fellow in the risk assessment of mycotoxins at a Member State organisation.</i>	Building expertise
Partnering grants		Support capacity building of Member States organisations in certain risk assessment areas. Example <i>A highly experienced organisation shares best practices in data collection.</i>	Exchanging knowledge

Grant principles

 co-financing	 non-cumulative	 non-profit	 non-retroactive
