

Parma, 15 September 2015

Note on the establishment of a Standing Working Group on Feed Flavourings of the Scientific Panel on Additives and Products or Substances used in Animal Feed (2015-2018)

The Feed Unit is requested to manage the administrative and scientific activities of the Standing Working Group on Feed Flavourings. The Feed Unit is also requested to organise the meetings of the Standing Working Group and assist in the preparation of the relevant EFSA scientific outputs in line with the tasks delegated to the Standing Working Group.

Background:

The European Food Safety Authority (EFSA) is the keystone of European Union risk assessment regarding food and feed safety, animal health and welfare, nutrition, plant protection and plant health. In close collaboration with national authorities and in open consultation with its stakeholders, EFSA provides independent and transparent scientific advice and clear communication on existing and emerging risks associated with the food chain. On request from the European Commission, European Parliament and Member States or on its own initiative¹, EFSA provides scientific opinions on issues falling under its remit.

The Scientific Panel on Additives and Products or Substances used in Animal Feed, which deals with questions on the safety and/or efficacy of additives and products or substances used in animal feed, confirmed during its 113th Plenary Meeting the need of a Standing Working Group on Feed Flavourings.

Terms of reference:

The objectives of the Standing Working Group on Feed Flavourings are to draft opinions on the safety for the target animals, consumers, users and the environment and the efficacy of additives from the functional group of flavouring compounds or additives with a similar mode of action. In order to fulfil its objectives, the above-mentioned Standing Working Group shall consist of members with expertise in the following scientific areas: animal nutrition/physiology/production, botanicals, toxicology, pharmacokinetics/pharmacodynamics/metabolism studies and ecotoxicology/environmental risk assessment.

¹ Regulation (EC) No 178/2002 of the European Parliament and the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety (OJ, L 31, 1.2.2002, p. 1-24).

Members:

During the 113th Plenary Meeting of the Scientific Panel on Additives and Products or Substances used in Animal Feed the Chair appointed (in consultation with EFSA) the Chair of the Standing Working Group on Feed Flavourings. The decision on the composition of the Standing Working Group was made by the Chair of the Standing Working Group upon proposal of the respective EFSA Head of Unit. The composition of the Standing Working Group on Feed Flavourings is available on the EFSA website².

Scope in EFSA's work and outsourcing programme:

The Standing Working Group will assess the available and relevant scientific information and data provided to EFSA by Members States and stakeholders, those submitted through the applicants' dossiers (when applicable), those collected through public calls for data, as well as those collected by EFSA itself. As appropriate, EFSA may outsource the collection, collation or analysis of scientific information, through its grant and procurement schemes, in order to support the scientific assessment of the Standing Working Group.

Timelines:

Provided the Standing Working Group on Feed Flavourings is not closed earlier, as a result of a period of inactivity, then its mandate will terminate 3 months after the inaugural meeting of the subsequent Scientific Panel on Additives and Products or Substances used in Animal Feed (2018-2021).

Expected deliverables:

Draft EFSA scientific output, which will be submitted for consideration and possible adoption by the Scientific Panel on Additives and Products or Substances used in Animal Feed.

SIGNED

Juliane Kleiner
Head of the Scientific Evaluation of Regulated Products Department (*a.i.*)
