

Parma, 29 August 2017

Note on the establishment of a Standing Working Group on Procedures under Article 8 of Regulation (EC) No 1925/2006 of the Scientific Panel on Food Additives and Nutrient Sources Added to Food (ANS) (2017-2018)¹

The Food Ingredients and Packaging (FIP) Unit is requested to manage the administrative and scientific activities of the Standing Working Group on Procedures under Article 8 of Regulation (EC) No 1925/2006. The Food Ingredients and Packaging (FIP) Unit is also requested to organise the meetings of the Standing Working Group and assist in the preparation of the relevant EFSA scientific outputs in line with the tasks delegated to the Standing Working Group.

Background:

The European Food Safety Authority (EFSA) is the keystone of European Union risk assessment regarding food and feed safety, animal health and welfare, nutrition, plant protection and plant health. In close collaboration with national authorities and in open consultation with its stakeholders, EFSA provides independent and transparent scientific advice and clear communication on existing and emerging risks associated with the food chain. On request from the European Commission, European Parliament and Member States or on its own initiative², EFSA provides scientific opinions on issues falling under its remit.

The Scientific Panel on Food Additives and Nutrient Sources added to Food (ANS Panel), which deals with questions on the safety of food additives and nutrient sources and certain other substances added to food, confirmed during its 66th Plenary Meeting the need of a Standing Working Group on Procedures under Article 8 of Regulation (EC) No 1925/2006 related to the evaluation of substances falling within this regulatory procedure³.

Terms of reference:

The objective of the Standing Working Group on Procedures under Article 8 of Regulation (EC) No 1925/2006 is to perform the following preparatory work for consideration by the ANS Panel:

¹ This document replaces the previous "Note on the establishment of a Standing Working Group on Procedures under Article 8 of Regulation (EC) No 1925/2006 (2014-2017)" dated of 25 November 2016, which was updated to reflect the renewal of the relevant Panel mandate (2017-2018).

² Regulation (EC) No 178/2002 of the European Parliament and the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety (OJ, L 31, 1.2.2002, p. 1-24).

³ Regulation (EC) N°1925/2006 of the European Parliament and the Council of 20 December 2006 on the addition of vitamins and minerals and of certain other substances to foods. OJ, L 404, 30.12.2006, p. 26-38.

- to evaluate the available scientific information on the safety in use of substances other than vitamins and minerals added to food for which an assessment is required;
- to carry out risk assessment and conclude on the safety of the proposed use of substances other than vitamins and minerals added to food,
- to deliver a draft scientific opinion on the substances examined.

In order to fulfil its objectives, the above-mentioned Standing Working Group shall consist of members with expertise in the following scientific areas: chemistry/plant biochemistry, ADME/physiology, general toxicology, genotoxicity, exposure assessment, risk assessment of food (food supplements), pharmacology/human medicine/clinical pathology and epidemiology.

Members:

Further to the amendment to Art. 28 of EFSA's Founding Regulation introduced by Commission Regulation (EU) No 2017/228⁴, in July 2017 the Scientific Panel on Food Additives and Nutrient Sources Added to Food (ANS) was renewed in its composition for one year only (2017- 2018). In order to minimise disruption of the work of the Panel, an ex-ante deviation was proposed by the Head of the FIP Unit and agreed by the EFSA Executive Director, allowing continuation of the already established Standing Working Groups of the ANS and CEF Panels for their one-year mandate 2017-2018. During the 75th Plenary Meeting of the Scientific Panel on Food Additives and Nutrient Sources Added to Food (ANS) the Standing Working Group on Procedures under Article 8 of Regulation (EC) No 1925/2006 was therefore reconfirmed as established in terms of chairmanship and composition. The composition of the Standing Working Group on Procedures under Article 8 of Regulation (EC) No 1925/2006 is available on the EFSA website⁵.

Scope in EFSA's work and outsourcing programme:

The Standing Working Group will assess the available and relevant scientific information and data provided to EFSA by Members States and stakeholders, those submitted through the applicants' dossiers, those collected through public calls for data, as well as those collected by EFSA itself (as applicable). As appropriate, EFSA may outsource the collection, collation or analysis of scientific information, through its grant and procurement schemes, in order to support the scientific assessment of the Standing Working Group.

⁴ Commission Regulation (EU) 2017/228 of 9 February 2017 amending Regulation (EC) No 178/2002 of the European Parliament and of the Council as regards the names and the areas of competence of the scientific panels of the European Food Safety Authority. OJ L 35, 10.2.2017, p. 10–11.

⁵ <https://ess.efsa.europa.eu/doi/doiweb/doisearch>

Timelines:

Provided the Standing Working Group on Procedures under Article 8 of Regulation (EC) No 1925/2006 is not closed earlier, (e.g. as a result of a period of inactivity), then its mandate will terminate 4 months after the inaugural meeting of the subsequent Scientific Panel on Food Additives and Flavourings (FAF) (2018-2021).

Moreover, as of 1st July 2018, the assessment of such substances carried out by this Working Group will be handed over to the NDA Panel.

Expected deliverables:

Draft EFSA scientific outputs, which will be submitted for consideration and possible adoption by the Scientific Panel on Food Additives and Nutrient Sources Added to Food.
