

Renewal Assessment Report

***Cydia pomonella* GV**

Carpovirusine

Volume 3 – B.1 Identity

Rev. 0 – 16 October 2020

Rapporteur Member State: Germany

Co-Rapporteur Member State: The Netherlands

Version history

When	What
16 October 2020	First version submitted to EFSA

The RMS is the author of the Assessment Report. The Assessment Report is based on the validation by the RMS, and the verification during the EFSA peer-review process, of the information submitted by the Applicant in the dossier, including the Applicant's assessments provided in the summary dossier. As a consequence, data and information including assessments and conclusions, validated and verified by the RMS experts, may be taken from the applicant's (summary) dossier and included as such or adapted/modified by the RMS in the Assessment Report. For reasons of efficiency, the Assessment Report should include the information validated/verified by the RMS, without detailing which elements have been taken or modified from the Applicant's assessment. As the Applicant's summary dossier is published, the experts, interested parties, and the public may compare both documents for getting details on which elements of the Applicant's dossier have been validated/verified and which ones have been modified by the RMS.

Table of contents

B Summary, evaluation and assessment of the data and information

B.1	Identity of the plant protection product	4
B.1.1	Applicant.....	4
B.1.2	Manufacturer of the preparation and the micro-organism	4
B.1.3	Trade name or proposed trade name, and manufacturer's development code number of the preparation if appropriate.....	4
B.1.4	Detailed quantitative and qualitative information on the composition of the preparation	4
B.1.5	Physical state and nature of preparation	5
B.1.6	Function	5
B.1.7	References relied on.....	5

B.1 Identity of the plant protection product

B.1.1 Applicant

Applicant: Arysta Life Science S.A.S.
Route d' Artix
BP80 F-64150 Noguères
France

Contact Point:

Phone:

Fax:

E-mail:

B.1.2 Manufacturer of the preparation and the micro-organism

Confidential information, see Volume 4

B.1.3 Trade name or proposed trade name, and manufacturer's development code number of the preparation if appropriate

Trade name: CARPOVIRUSINE

Code number: I1136ab / ARY-0453a-03 (initial EU dossier representative composition)
I1136aa / ARY-0453a-04 (actual representative composition)

B.1.4 Detailed quantitative and qualitative information on the composition of the preparation

Cydia pomonella Granulovirus:

Arysta LifeScience S.A.S. deposited their CpGV Mexican isolate in 2005 at the German Collection of Microorganisms and Cell Cultures (DSMZ), Inhoffenstraße 7B, D-38124 Braunschweig, Germany.

Virus accession number: GV-0002

CARPOVIRUSINE:

Declared content of CpGV-M: 1×10^{13} granules/L

Content of technical CpGV-M: 909 g/L (85.33 %)

Minimum content of CpGV-M: 8×10^{12} granules/L

Maximum content of CpGV-M: 1.25×10^{13} granules/L

Content of contaminating micro-organism *Bacillus cereus*: $< 1 \times 10^7$ CFU/g

For further information see Volume 4.

B.1.5 Physical state and nature of preparation

Suspensions concentrate (SC)

B.1.6 Function

Function: Viral entomopathogen, functioning as a microbiological insecticide.

Field of use: Orchard and home-gardening

B.1.7 References relied on

See Volume 4.
