Conditions for safe storage:

Keep the product in its original container in a cool and dry place.

Disposal of the product and its container:

Dispose of contents/container to approved disposal company or local collection point.

Authorized uses and doses:

Crops	Target	Application dose	Method of application	Remarks
Citrus	Mediterranean Fruit Fly (<i>Ceratitis capitata</i>)	1.5 L/ha	Foliar application	To be used in mixture with insecticides
Persimmon	Mediterranean Fruit Fly (<i>Ceratitis capitata</i>)	1.5 L/ha	Foliar application	To be used in mixture with insecticides

Note: The insecticides used for the mixture must be authorized for these specific uses. The timing of the application, the number of applications and interval between applications as well as the pre-harvest interval (PHI) must be in accordance with the label and instructions of use of the insecticide chosen for the mixture.

Instructions for use:

Follow the instructions for use of the insecticide chosen for the mixture. Once the insecticide has been added into the spray tank, pour the required quantity of SVMA14-004, stir well and add the remaining amount of water. The mixture should be applied as soon as possible after mixing.

Mode of action:

The product SVMA14-004 acts as an attractant to the flies and increases the action of the insecticide used in the mixture.
