IUCLID – (no CADDY, no duplication of work)

Already in place

- GFL format to be decided by the Authority
- 1107/2009 and 1740/2020 refer to IUCLID
- Specific guidance has been aligned

Planned for 2023

- 1S1A – Regulation on data establishing EU-CDPC
- New Food areas candidates for IUCLID submission in the SANTE portfolio

Admissibility

- Still a considerable backlog from 2021/early 2022 not always related to IUCLID
- The scenario is better for the second half of 2022 showing an improvement both in dossier and RMS skills in “navigating” IUCLID
- 3 MRL dossiers submitted in 2023 already declared admissible
- Make use of the EFSA support!

Participate in WG on report generator

- MO assessment report
- Flag the reports you need

Future challenges

- Additional food areas
- Options to manage multiple submissions of similar substances (e.g. Pheromones)
- Safeners and Synergists (PPP)
