

88TH ADVISORY FORUM  
STOCKHOLM, 27-28 JUNE

# **PERA-FPA: FRAMEWORK PARTNERSHIP AGREEMENT (FPA) FOR ADVANCING THE ERA OF PLANT PROTECTION PRODUCTS**

Domenica Auteri

# MULTIANNUAL PLAN - OVERVIEW

# OPPORTUNITIES FOR PARTNERSHIP

## ➤ Grant on ERA methodologies for PPP of low concern

- Science-based criteria for considering data requirements;
- Alternative methods for exposure and hazard assessment for PPPs

Open until  
15/9/2023

500 K

Grant

## ➤ Grant for Framework Partnership Agreement (FPA) to advance the ERA of PPP

# FPA – ADVANCING THE ERA OF PPP

Set a partnership to help us addressing the following objectives:

- To understand pathway of **exposure** for application methods other than the standard ones e.g. precision techniques
- To understand the **relevance** of exposure (i.e. can it be excluded?)
- To **quantify the exposure** in the relevant exposure matrices/environmental compartments
- To develop appropriate and up to date **exposure models**
- To **link the exposure with the effects** to non-target organisms by defining exposure scenarios for ERA
- To have suitable **effect models** to be use in risk assessment
- To start conceptualize the development of an ERA platform which will allow the integration of tools, methods and data from different sources

# FRAMEWORK PARTNERSHIP AGREEMENT (FPA)

The FPA will cover different areas and with specific grant agreement the aim is to address various needs that are clustered in 4 main areas, primarily to be prepared for the revision of the terrestrial guidance document e.g.:

- Collect and generate data enabling to further improve the current knowledge on the exposure of non-target organisms in agro-ecosystems
- Collect data on the hazard
- Identify innovative tools for assessing the PPPs effects at higher level of biological organisation
- Design an ERA platform

Max budget: 10 Mil\*
