EUROPEAN POLICY ON  
ONE HEALTH

FOOD AND HUMAN  
HEALTH

ANIMAL HEALTH

PLANT HEALTH –  
AGRICULTURAL POLICY

THE ROLE OF INDUSTRY  
AND CONSUMERS' IN  
FOOD SAFETY AND IN  
ACHIEVING THE  
OBJECTIVES OF ONE  
HEALTH

- Visibility of EFSA's work in a national perspective
- New methods with enhanced sensitivity to detect hazards in food -> need to be better explored to protect **public health**
- Risk communication presented for the first time -> delivering the message that science goes together with communication
- Importance of data -> evidence based approach
- New normal (internet, climate change, food supply issues) -> requires an holistic approach in order to protect **public health**
- Increase awareness to all sectors on potential risks along the food chain for the production of healthy food
- Provided a ground for engagement and collaboration among all disciplines and all sectors in food chain
- Better coordination of official controls to protect **public health**
- Call for similar events to promote dialogue and enhance collaborations
- Agenda and Press release: <https://t.ly/Lcn6z>

**Event that fulfilled the expectations of the audience**
