

Interactive and user-friendly dashboard - for monitoring food and feed safety alerts in the RASFF database

Lis Alban

DVM, PhD, DipECVPH
Chief Scientist, Danish Agriculture & Food Council
Adjunct Professor, University of Copenhagen

Food and feed safety alerts

Important for food business operators (FBOs) to act and react on relevant events/developments

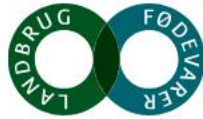

- In EU, data are gathered in the Rapid Alert Systems for Food and Feed (RASFF)
- However, overviews and deeper insights are not always easy to get
- How can the FBOs find what is relevant for them?

At Danish Agriculture & Food Council, we developed a dashboard

- To better meet the users' need, implying the FBOs

Our website: <https://agricultureandfood.dk/>

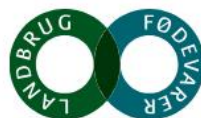

Danish Agriculture & Food Council

Danish Agriculture & Food Council represents the farming and food industry of Denmark including companies, trade and farmers' associations.

Viden om Fødevarerproduktion **Food and feed safety alerts**

Food and feed safety alerts

In this dashboard you can find daily updated data from the Rapid Alert Systems for Food and Feed (RASFF).

Note: Denne side findes kun på engelsk.

Welcome to the DAFC food incidents dashboard.

This dashboard allows you to efficiently navigate the data of the Rapid Alert Systems for Feed and Feed (RASFF) database with a unique set of views and interactions.

Updated daily, the DAFC food incidents dashboard lets you get a high-level overview of current food incidents and deep dive into specific cases with the possibility of downloading the data for further exploration or documentation.

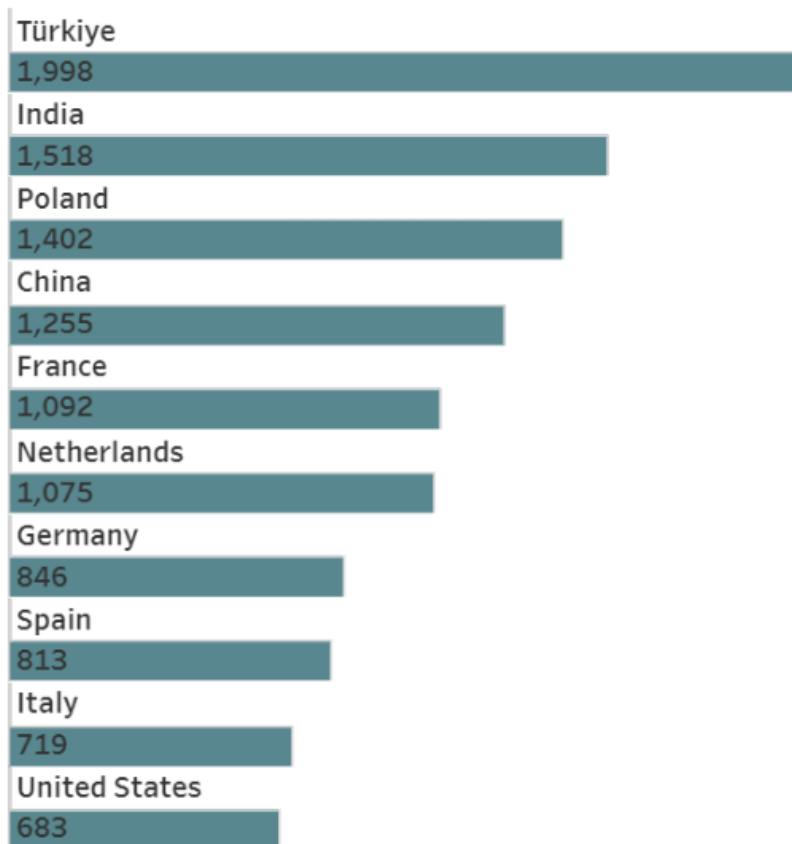

Guide

Number of Incidents Year to Date

The incidents from January 1st of the current year are counted until today. For comparison the same period of the previous year is being looked at.

			Recall from consumer	Potentially serious
05/01/2023	Denmark	Meat and meat products (other than poultry)	Relabelling	Serious
07/11/2022	Denmark	Meat and meat products (other than poultry)	Withdrawal from the market	Serious

Details about specific alert are provided

The screenshot displays a RASFF alert interface. At the top left, a line chart shows the number of incidents (Numt) over time, with a peak in November 2023. Below the chart is a 'Filters' section with a dropdown menu for 'Origin' set to 'Denmark'. The main part of the interface is a 'Details' panel for a specific incident, which is highlighted with a red rounded rectangle. This panel includes 'Incident Details' (RASFF Risk decision: Serious, Origin: Denmark, Product category: Meat and meat products (other than poultry), Product type: Food, Action taken: Withdrawal from recipient(s), Subject: Risk of metal pieces in Tulip Salami) and 'Notification Details' (Date of notification: 21/03/2024, Notification basis: Company's own check). Below the details panel is an 'Incident List' table. The table has columns for 'Date of noti..', 'Origin', 'Cate', and 'Risk decision'. The first row in the list is highlighted in grey and matches the details shown in the panel above it. To the right of the details panel, there is a 'Download PDF' button and a note: 'for further details please click on the risk decision'. At the bottom right, there are radio buttons for 'Keep Only' (checked) and 'Exclude'.

Date of noti..	Origin	Cate	Risk decision
21/03/2024	Denmark	Mea poultry)	Serious
26/09/2023	Denmark	Poultry meat and poultry meat products	Serious
28/02/2023	Denmark	Meat and meat products (other than poultry)	Potentially serious
24/02/2023	Denmark	Meat and meat products (other than poultry)	Potentially serious

Functionality will allow you to save the list as a pdf file

- For later use
