2. GRANT ON WELFARE MONITORING: DATA DRIVEN RISK ASSESSMENT IN FAST AND SLOWER GROWING BROILERS

Cristina Rojo Gimeno, Scientific Officer
Animal Welfare team, BIOHAW Unit

NEW EFSA GRANT 'BROWARD' : THE WELFARE OF BROILERS

Title of the grant: Welfare monitoring: data driven risk assessment in fast and slower growing broilers (BROWARD)

The call aims at identifying a consortium of Art 36 Organizations with experience in welfare of poultry in particular broilers (**EU Bodies and Agency Call**)

The objective of the call is to collect **Field and Experimental data** of animal-based measures (ABMs) and related management, resource-based data from slow and fast-growing broiler chickens

Grant

BROWARD TECHNICAL SPECIFICATIONS

Develop a protocol for ABMs that measure restriction of movement, soft tissue lesions and integument damage, locomotory disorders

Field observational data on ABMs (commercial farms, hatcheries and slaughterhouses)

Experimental data with variations of stocking density, enrichment and on-farm hatching in fast-growing (e.g. ROSS 308) and slower-growing broiler chickens (e.g. Ranger)

Expected outcome: to develop a dataset to analyse relationships between ABMs and management-, resource-based data from fast and slower growing broilers
