

THE GREAT GARDEN RESCUE

fighting Pesty, the plant pest

M eet the Martens. They are a family living in Europe, just like yours and mine. Grandpa Henrik loves his garden. It is full of cherished memories and fresh veggies. Janet, his eldest granddaughter, and her little brother Theo love helping. They enjoy watering and pruning to bring the garden to life.

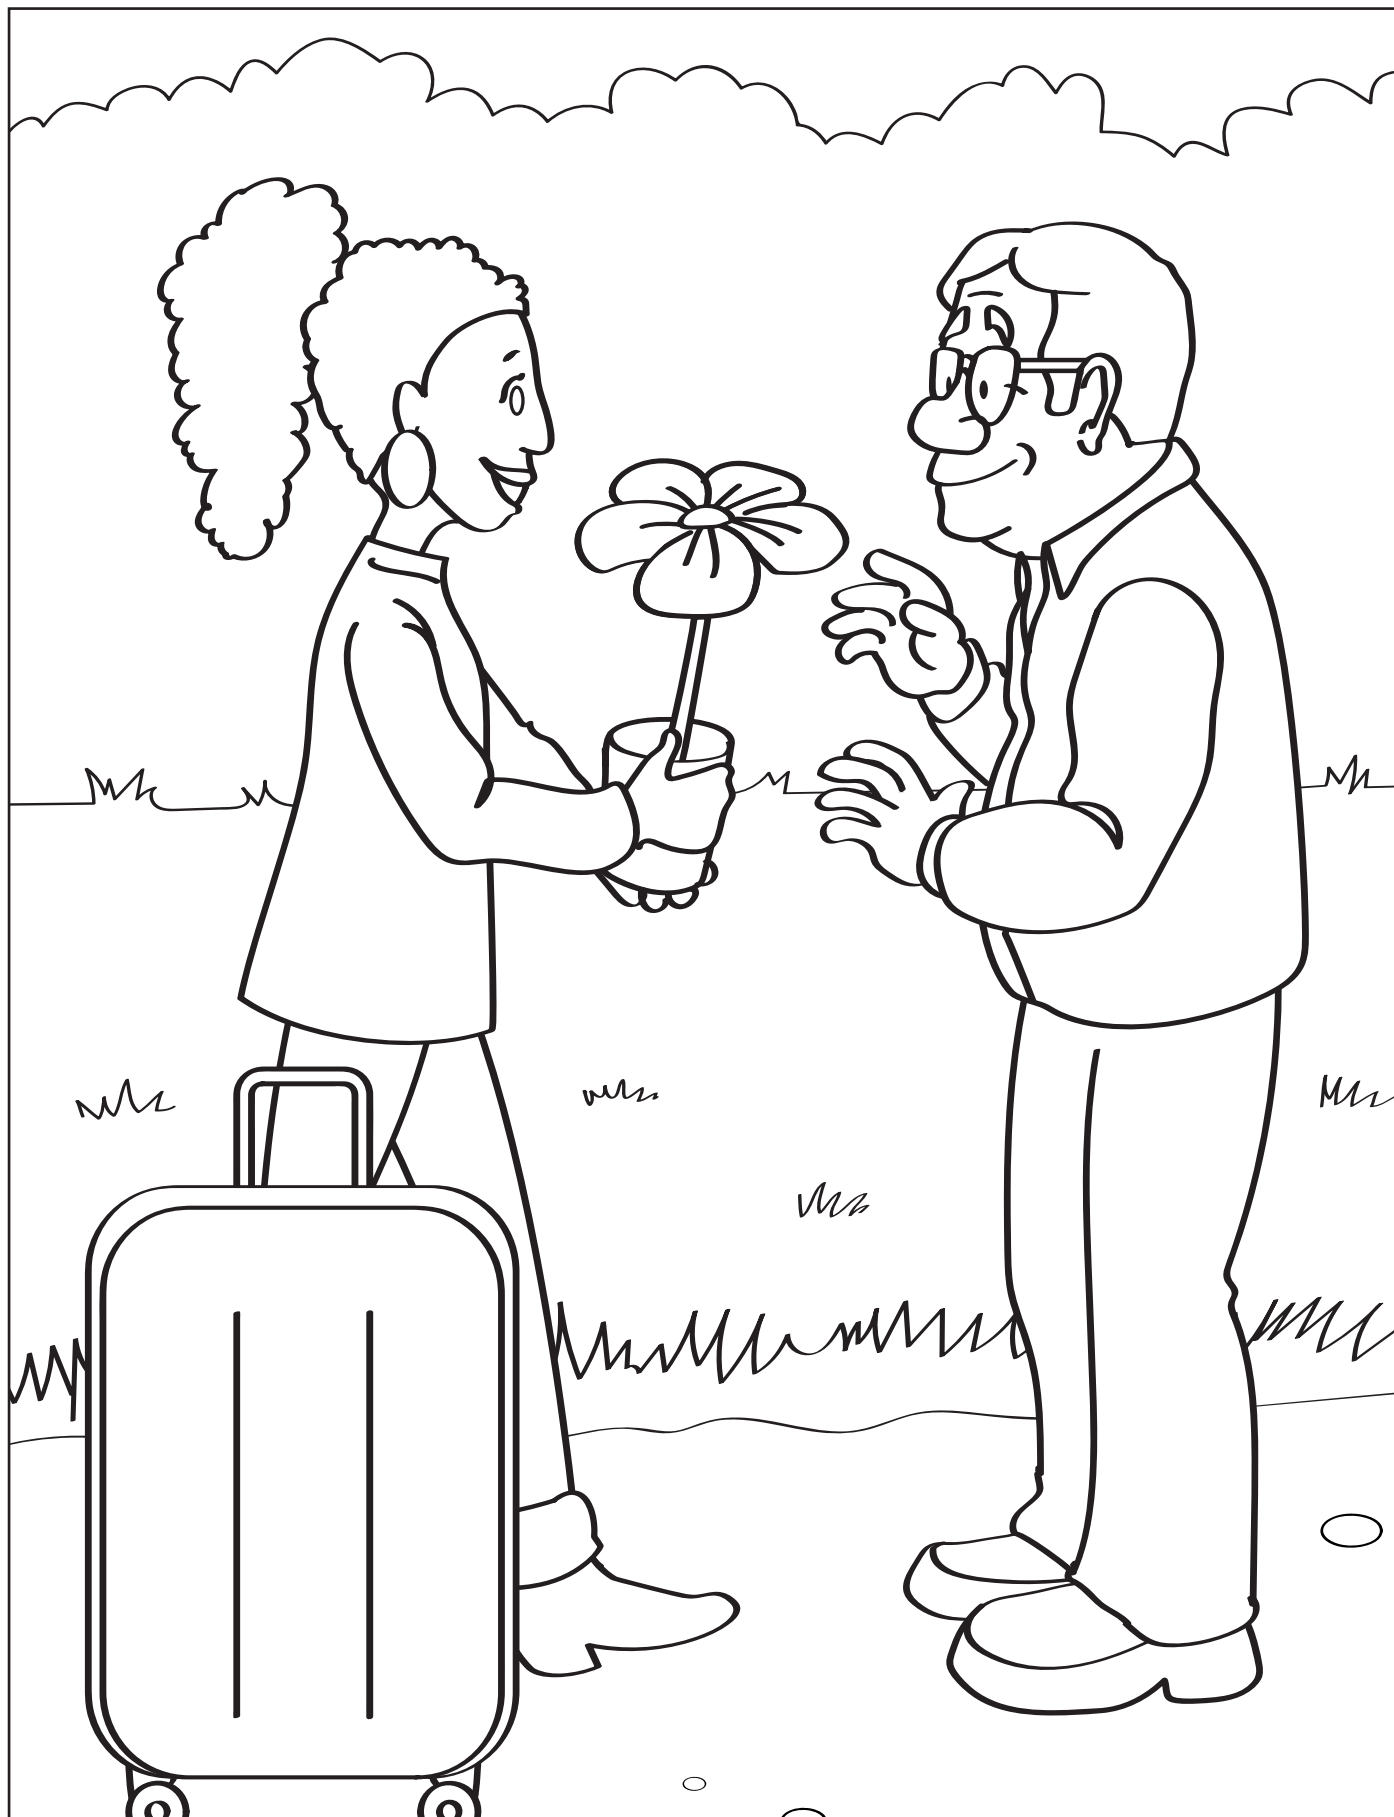

Janet spends a year studying abroad. As she is about to return home, she has a bright idea! During her last trip in the forest, she sees an exotic flower and decides to bring it home as a gift for her Grandpa. Without thinking twice, she picks the flower.

As Janet packs her bag, Pesty hides on the plant with an evil grin.
"I love getting a free ride and causing trouble in new places!" it thinks.

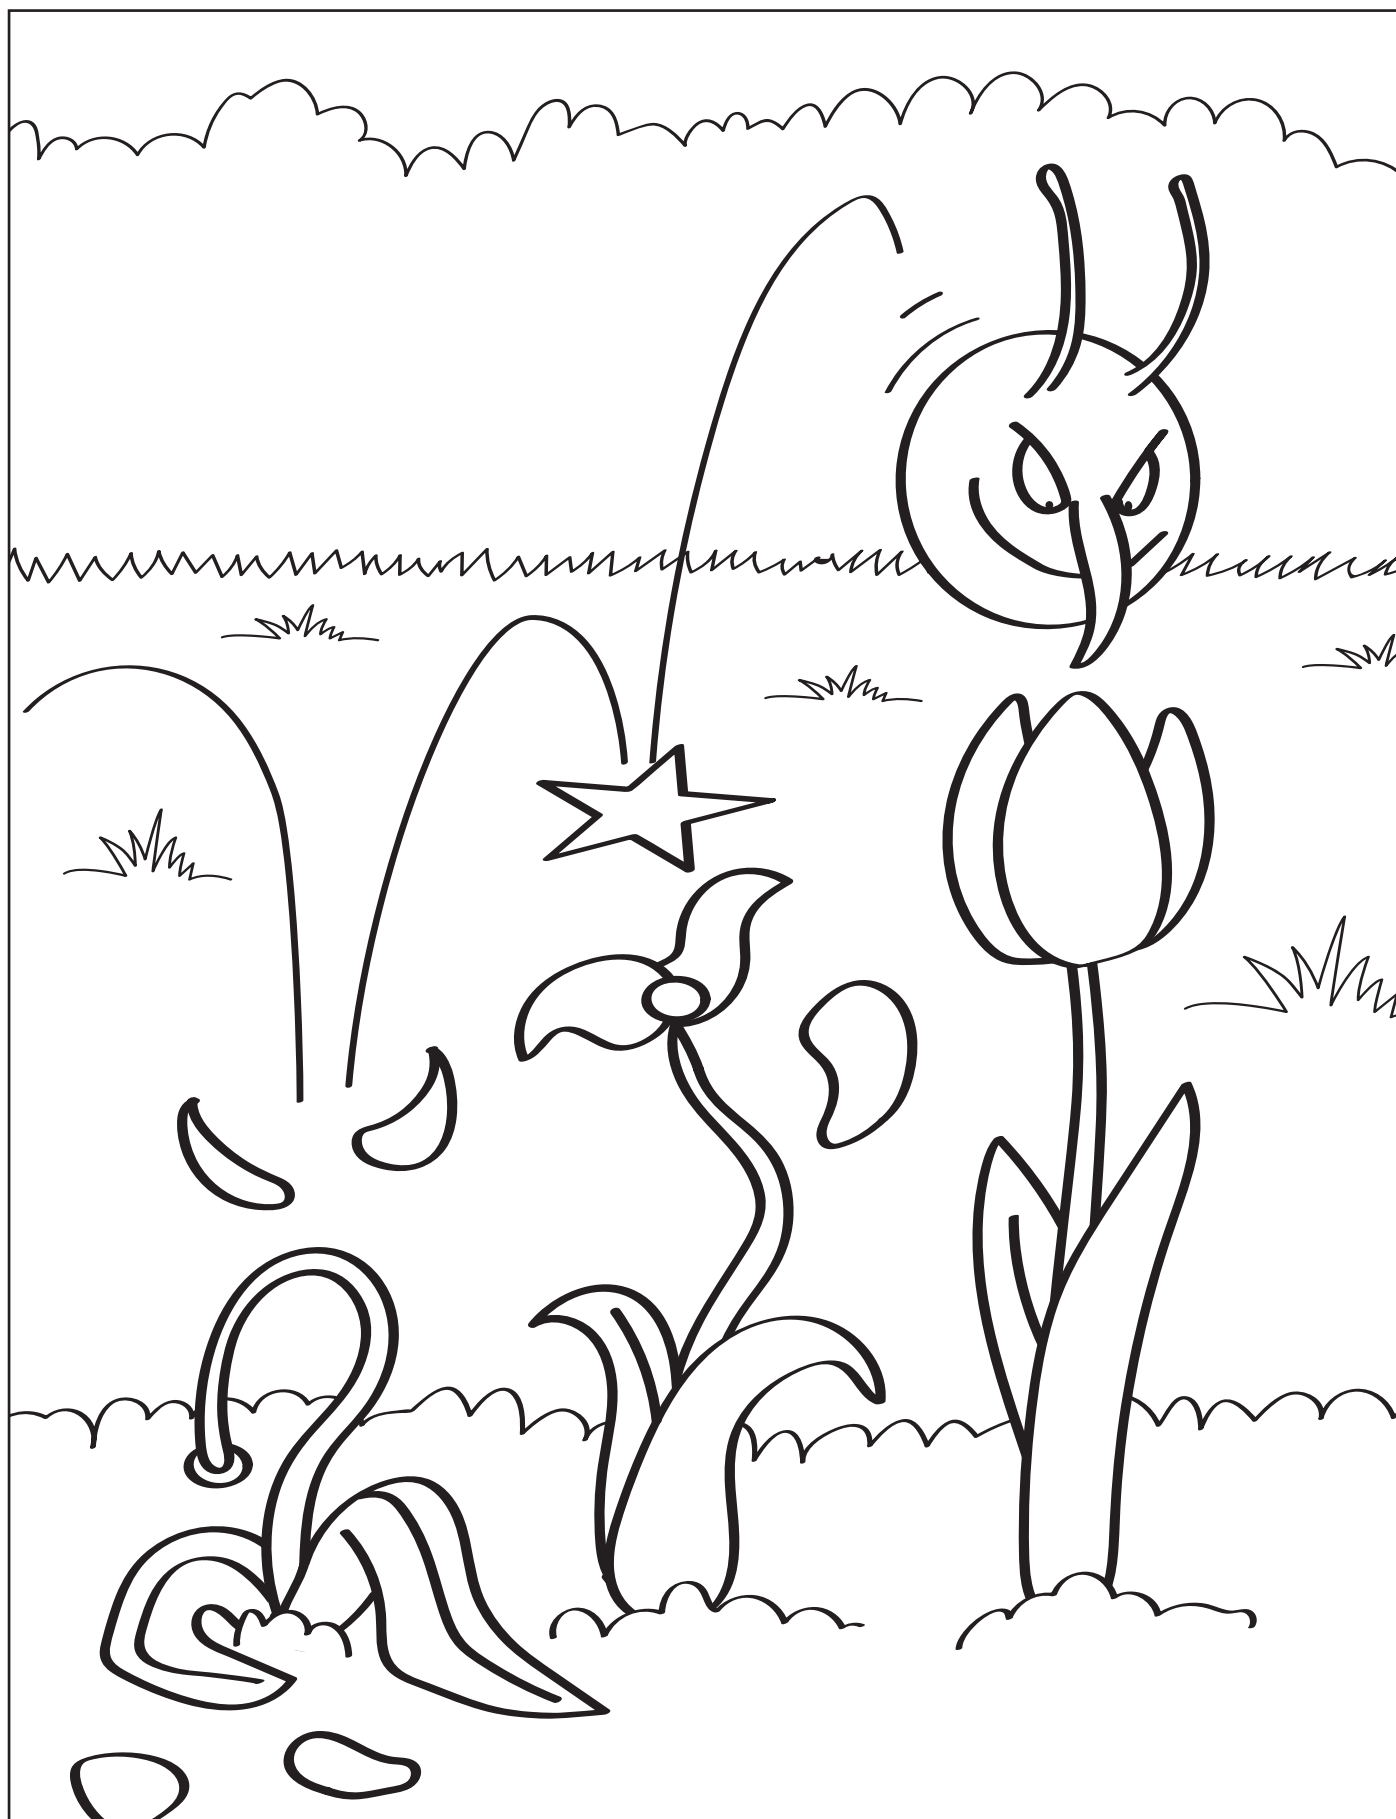

The family is very happy to be back together. Janet shares stories of her adventures and gives Grandpa Henrik the exotic plant. She doesn't know she has brought home more than she expected!

The family joins Grandpa Henrik in the garden, where he has planted the new exotic plant. It looks amazing, but they have no idea that Pesty has an evil plan. Pesty chuckles to itself as it moves around the garden, deciding what to destroy next!

It's dinner time for Pesty. Every plant it touches or eats starts to die, while Pesty grows stronger and laughs louder. Its appetite is endless. Pesty destroys everything because that's its favourite thing to do... which is why it shouldn't be in Grandpa Henrik's garden!

A few days later, Janet and Theo visit Grandpa to see how he's doing. They find him lost in his garden, looking confused. His plants are dying, and his vegetable patch is a mess.

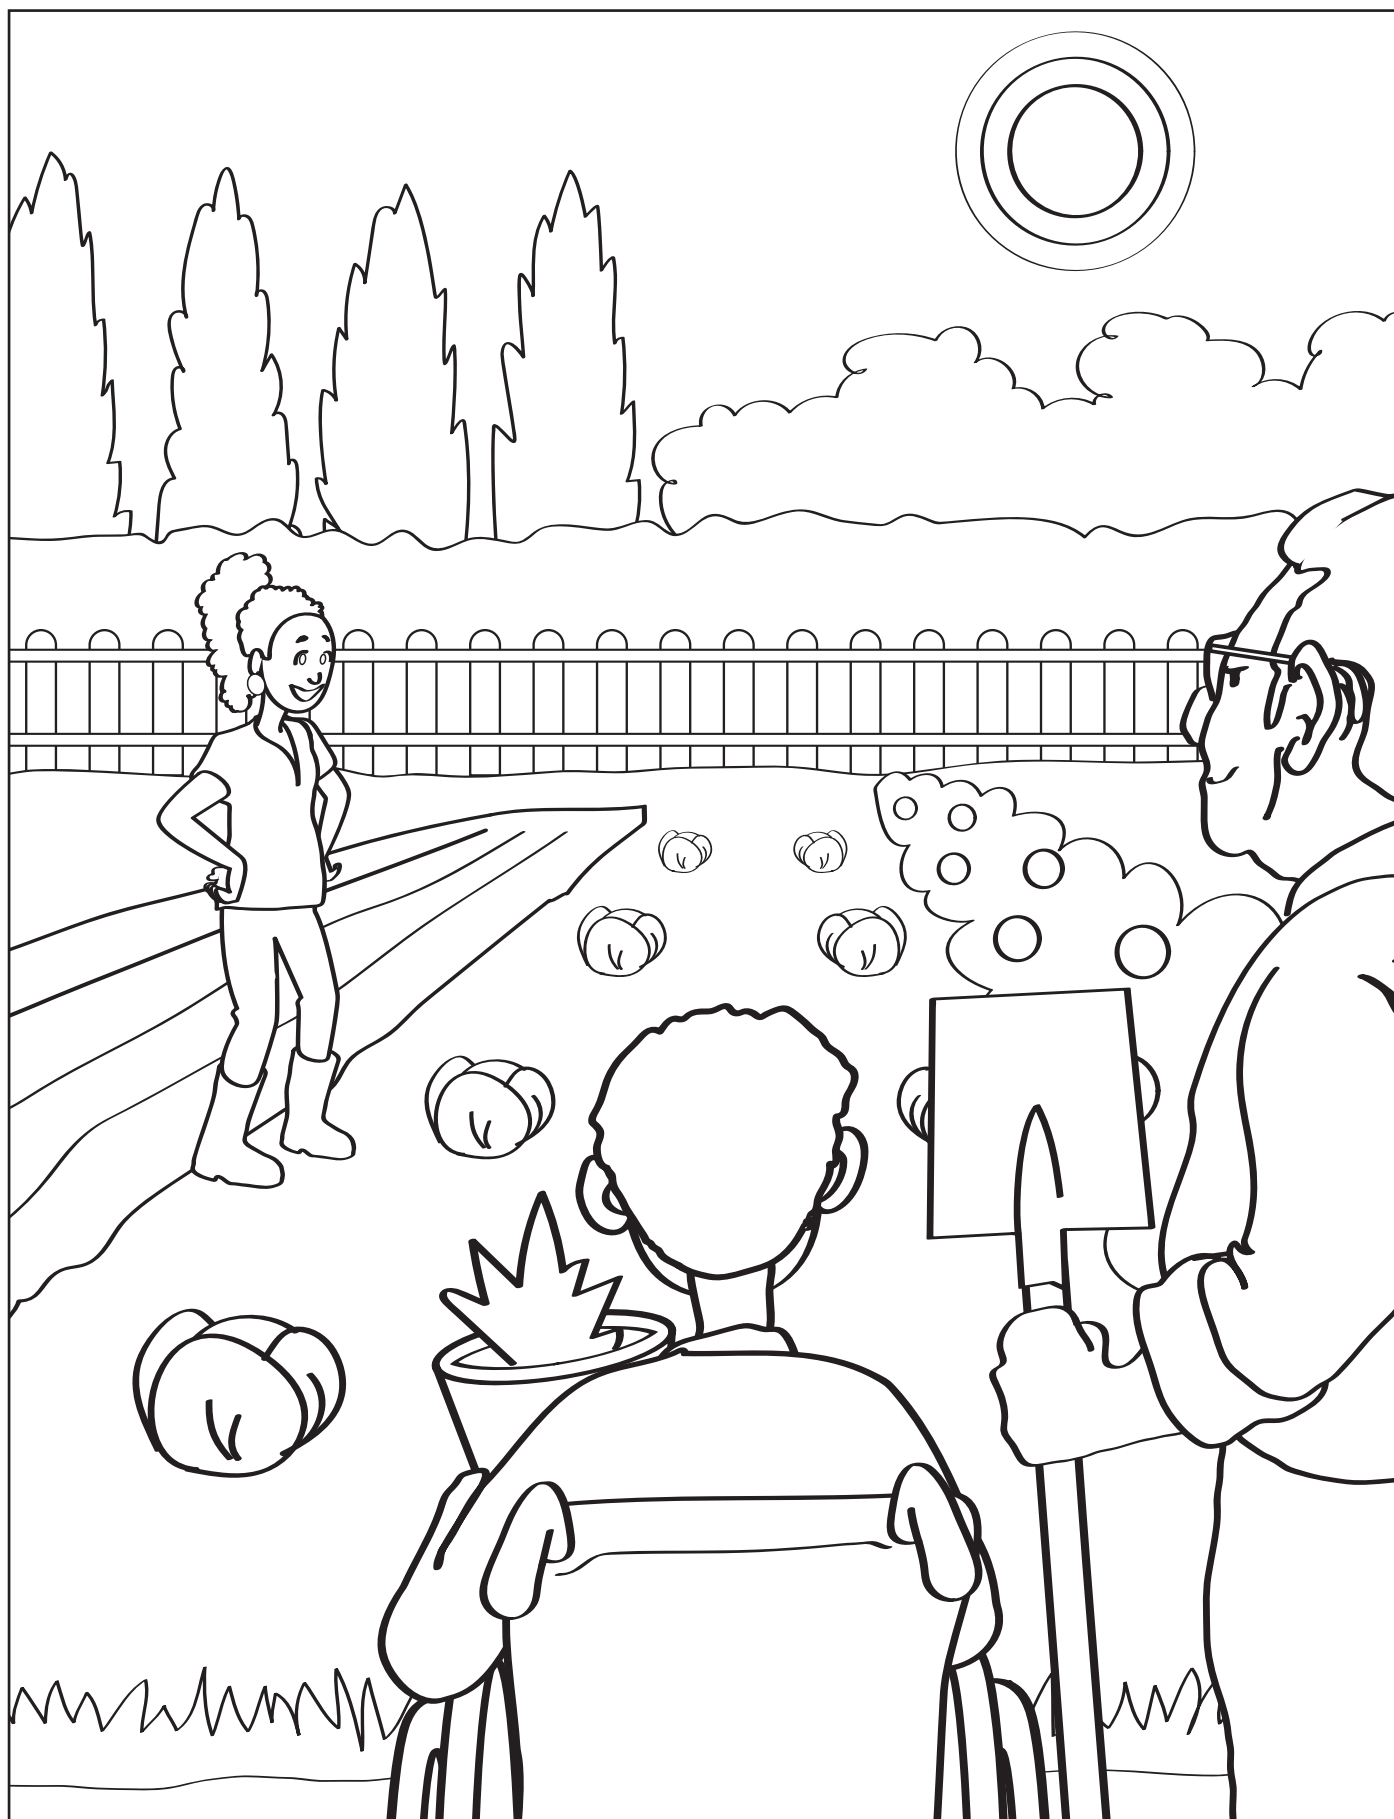

Theo thinks of calling some local plant experts. A team comes to check things out and find a solution. Pesty sneaks away, knowing its plan has been found out.

The team of experts quickly finds the problem. “Where did this plant come from?” they ask, pointing to the exotic flower. Janet says she brought it back from her travels as a gift for Grandpa. The mystery is solved! The experts recognise Pesty as the villain and its days of causing trouble are numbered. The team quickly starts treating the garden. Pesty begins coughing and wheezing.

Thanks to their efforts and Grandpa's gardening skills, the garden is saved! The family plants healthy, certified plants, and the garden soon thrives with colours and fresh fruit and vegetables. Pesty is gone, and the family learns an important lesson: bring home photos — not plants — from your trips outside the EU!

Join Janet and Theo
on a thrilling gardening adventure!

When Janet, a well-meaning teenager, brings home a mysterious flower from her study abroad, she accidentally releases Pesty, a sneaky plant pest, into her Grandpa Henrik's cherished garden.

With plants dying and chaos spreading, can Janet and Theo save the garden in time? Discover how even the smallest, prettiest flower can hide a big problem.

Dive into this heartwarming family story about nature and teamwork.
