

Update on Advisory Group on Data

Ákos Jozwiak, Hungary

31ST (PHYSICAL) AND 32ND (ONLINE) MEETINGS OF AGOD

- MS presentations national AI initiatives
- Interagency presentation: European Health Data Space
- Explainable AI
- Subgroup check-in & Joint SG meeting
- Progress of Tailor-Made Activities
- Evaluation of new FP Tailor Made Proposals
- Roadmap update & approval
- 2026 Data Symposium

MS PRESENTATIONS NATIONAL AI INITIATIVES

- **Data mapping** and **standardisation** are shared priorities
- **AI** applications in **risk assessment** are emerging across countries, focusing on **automation** and **predictive analytics**
- Data and AI projects in the interface of **RA-RM decision making**
- Whole Genome Sequencing (**WGS**) and **outbreak preparedness** are collaborative themes
- **RAG approach** is explored in multiple projects, as well as network science and **knowledge graphs**
- **Interoperability** is key in most initiatives
- **Capacity building** (e.g., data and AI literacy, trainings) is an emerging topic

EUROPEAN HEALTH DATA SPACE

(NATALIA ZYLINSKA PUTA – EHDS IT LEAD, DG SANTE INFORMATION SYSTEMS UNIT)

EHDS – what is it about?

Primary use - use of data for the delivery of healthcare

Empower individuals to take control of their health data and facilitate the exchange of data for the delivery of healthcare across the EU.

Improving patients' access to their health data.

Ensuring seamless exchanges for continuity of healthcare.

Secondary use - use of data for research and public interest purposes

Common EU rules and processes for requesting and reusing health data for research, innovation, policy-making, and regulatory activities.

Electronic health record (EHR) systems and wellness applications

Common interoperability standards in EU, supporting both primary and secondary use.

EUROPEAN HEALTH DATA SPACE

(NATALIA ZYLINSKA PUTA – EHDS IT LEAD, DG SANTE INFORMATION SYSTEMS UNIT)

European Health Data Space IT systems

Domain	Union systems	Union systems Status	National Governments systems
Primary	Central Terminology System (eHDSI)	In production	N/A
	Reference implementation of NCP (eHDSI)	Delivered	eHealth National Contact Point in every Member State To be operational as from 2029 at the latest
	EU Database of EHR systems and wellness applications	In progress Production as from 2027	N/A
	European Digital Testing Environment	In progress To be delivered in 2027	Digital Testing Environment in every Member State To be operational as from 2029
Secondary	HealthData@EU Central Platform	In progress Production as from 2027	Health Data Access Body Portal or other system To be operational as from 2029 at the latest
	Union Data Access Service	In planning Operations as from 2029	
	Union Secure Processing Environment		Secure Processing Environment in each country To be operational as from 2029 at the latest

MyHealth@EU

HealthData@EU

European
Commission

EUROPEAN HEALTH DATA SPACE

(NATALIA ZYLINSKA PUTA – EHDS IT LEAD, DG SANTE INFORMATION SYSTEMS UNIT)

HealthData@EU Central Platform

- The HealthData@EU Central Platform is the system being developed by the European Commission to meet the requirements of the European Health Data Space Regulation.
- The platform hosts the Dataset Catalogue, which compiles metadata from Member States, European institutions, third countries, and research infrastructures.

The screenshot displays the HealthData@EU Central Platform interface. At the top, there is a header with the European Union logo, a login button, a language selector set to 'EN', and a search bar labeled 'Search Datasets records'. Below the header, a blue box contains a message about the test environment of the HealthData@EU Central Platform. The main navigation bar includes links for Home, EU Dataset Catalogue, SPARQL Search, Statistics, Glossary, Applications, and Documentation. The current page is 'Dataset Records', as indicated by the breadcrumb 'Home > Dataset Records'. The page features a left sidebar with various filters: Formats (Select), Catalogues (Select), Keywords (Select), Data scope (Select), Licences (Select), Health Data Access Body (Select), Publisher (Select), and Categories (Select). The main content area shows a search bar, a 'Dataset Records' tab, and a 'Sort by' dropdown set to 'Name ascending'. It indicates '5 dataset records found'. Two dataset records are visible: 1. '[Adapted] Antimicrobial resistance in the ECDC atlas' with a creation date of 22 September 2022 and a location tag for '[Test] EU datasets'. 2. '[Adapted] Finnish Care Register for Health Care (Terveys-Hilmo, Hilmo)' with an update date of 29 February 2024 and a location tag for '[Test] Finnish National HDAB'.

EXPLAINABLE AI (PAOLO MERIALDO, ROMA TRE UNIVERSITY)

- eXplainable AI (xAI): understanding what AI systems actually learn
- EU AI Act Article 13: Transparency required for high-risk AI systems

The problem: modern "Clever Hans"

- Wrong features: wolf/husky classifier actually detects snow, not animals
- Ethical issues: COMPAS system shows racial bias in criminal risk assessment
- Business impact: beer matching fails due to spurious word correlations
- Regulatory risk: black-box decisions violate transparency requirements

The solution: faithful explanations

- Verify learning: ensure AI uses correct features, not shortcuts
- Build trust: provide transparent, understandable decision processes
- Enable debugging: identify and fix biased or incorrect patterns
- Meet compliance: satisfy regulatory transparency requirements

Predicted: Wolf
True: Husky

Explanation

Saliency Maps:

patterns

Removal Tests:
Validate feature
importance

SUBGROUPS CHECK-IN

- Feedback on Subgroup activities
 - People and Capacity: data literacy definitions and layers; data conference
 - Data management: data quality & KPIs; terminology catalogues; European food safety data ecosystem
 - Innovation: position paper on AI
- Joint SG meeting
 - Discussing cross-cutting issues

Bringing down pies from the sky
Impressionist AI, 21st century, mid-20s

PROGRESS OF TAILOR-MADE ACTIVITIES STARTED IN 2024

- ⚙ Data model mapping tool – implementation (Sweden)
- ⚙ Data model mapping tool (Italy)
- ⚙ Data capture @ point of sampling (Portugal)
- ⚙ Extension of the risk assessment knowledge integration platform “RAKIP-web” (several leading MS)
- ⚙ Cross member state collaboration and development for improved outbreak investigation, preparedness and sharing of whole genome sequences in the EU (Denmark)
- ⚙ Filling food consumption data gaps from Sweden and Denmark (Sweden)
- ⚙ Large language models analysis for automatic foodex2 codification (France)
- ⚙ Rebuild data framework – new data ingestion and management system member states recommendations and enhancing for new functionalities (Sweden, Italy, EFSA)
- ⚙ Use of inter- and intrasectoral WGS comparisons for mapping sources and spread of salmonella enteritidis – (Sweden)

DATA FLOW MAPPING IN MEMBER STATES – SECOND ROUND IN 2026

10 participating European countries

18 country reports

10 Challenges and Solutions reports

1 Summary report

Why should you join in 2026?

- To **understand** where complexity and pain points lie in the data collection processes
- To **collaborate** with other MSs and increase awareness on common processes & problems and expertise exchange
- To **resolve** identified issues by introduction of shared tools developed by EFSA where possible, or in collaboration with other MS as FP Tailor Made Activities

How much working time is required?

- Duration: 2,5 months
- Estimated working time per data domain: 7-10 days
- Funding available through FP Framework as Tailor Made Activity

NEW DATA TAILOR MADE ACTIVITIES – PROPOSAL EVALUATION

Data Standardisation, AI-supported Data extraction and Capacity Building for Member State Tracing Activities (DataACT)

Development of a Data Management System for Enhanced Chemical Risk Assessment in Food Safety

Machine Learning-Driven Risk Ranking Framework for Virulence & Resistance Traits: An E. coli Case Study

Implementation of a Data Mapping Tool - year 2

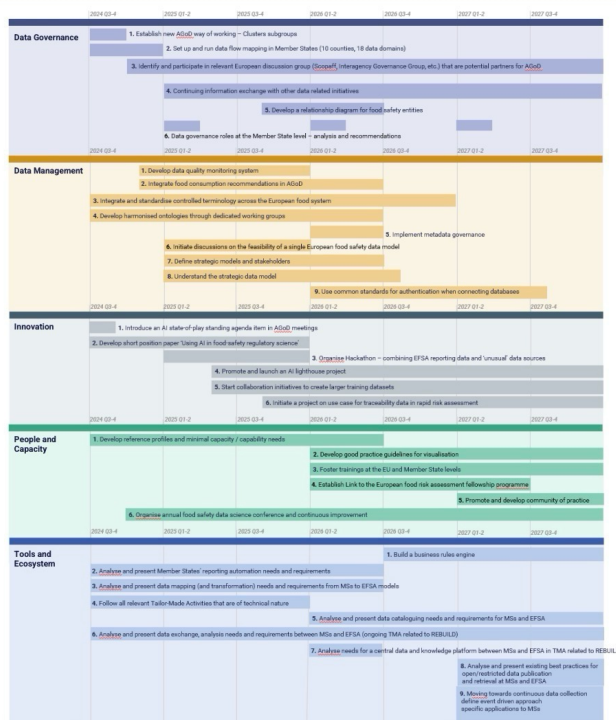

FLARE – Framework to quantify Likelihood and Availability to assess potential Risks in e-Commerce

Improving tools and capacity for data-centered control planning

ROADMAP UPDATE & APPROVAL

Advisory Group on Data Roadmap 2024–2027

- AGoD and SG Leaders reviewed the status of the roadmap and highlighted expected changes
- The roadmap will be updated at the end of the year
- The Updated version had been approved by AGoD
- Progress and update report to the Advisory Forum will be given at the end of the year

2026 DATA SYMPOSIUM

- Time: second half of 2026, back-to-back with AGoD/AF meeting
- Place: Dublin (Ireland)
- Participants: AGoD, SGs, AF, FP(*tentative*)
- Duration: 1.5 days
- Content: (*draft idea*) People Readiness for AI / Acceptance of AI
 - Also include dedicated physical SG meeting(s)

CALL FOR ENGAGEMENT 2026

Join the new round of DATA FLOW MAPPING IN MS

To complete the picture in Europe
Funding available as Tailor Made Activity
MS are invited to participate.

Join AGoD or SUBGROUP

For more info, please see the Terms
of Reference: [Terms of Reference](#).

Attend the 2026 AGOD DATA SYMPOSIUM

To be held in the second half of 2026

Initiate or join new FOCAL POINT TAILOR MADE PROJECTS

For additional info please visit [FP
Tailor-made activities - Home](#).

ADVISORY GROUP ON DATA: MEETINGS IN 2025
