

CLE perspectives on scientific assessment of PFASs

Taking PFAS seriously

We treat PFAS and TFA as serious issues that must be managed with sound science.

Robust EU legislation

Plant protection products are subject to one of the world's strictest regimes (Reg. 1107/2009) with case-by-case, science-based assessment.

State of European agriculture

Farmers face climate, market and regulatory pressure with a shrinking toolbox – broad PFAS bans risk removing last-line tools.

Active, science-based contribution

CLE experts are working with authorities to improve data collection and scientific methodologies on TFA and PFAS, supporting proportionate, evidence-based decisions.
