

NOTE TO THE MANAGEMENT BOARD

Management Board mandate 2022-2026

The 104th meeting of the Management Board marks the final meeting of the Board in its current composition before the new mandate begins on 1 July 2026.

This presentation provides a concise overview of the work carried out by the Management Board during its mandate from July 2022 to June 2026. It highlights the scale of the Board's activity over the past four years, including the adoption of strategies and policies. The presentation also recalls the Board's main achievements in strengthening EFSA's governance and operational framework, notably through revisions to key governing instruments, decisions relating to the Scientific Committee and Scientific Panels, and the selection of the Executive Director.

In addition, it outlines the Board's contribution to reinforcing EFSA's independence framework, including the revised Independence Policy and related implementing rules, as well as its strategic role in reviewing the current EFSA Strategy and preparing the next strategic cycle for 2028–2034.

Finally, the presentation places these achievements within the broader remit of the Board's governing function and serves as an opportunity to acknowledge the commitment and contribution of its members at the close of the mandate.
