VOLUME 3 – Annex B (AS)

Laminarin

B.4 Further information

Rapporteur Member State: The Netherlands

April 2016

**Draft Re-Assessment Report and Proposed decision of the Netherlands
prepared in the context of the possible renewal of laminarin under Regulation
(EC) 1107/2009**

TABLE OF CONTENTS – VOLUME 3 B.4

B.4	Further information	4
B.4.1	Methods and precautions concerning handling, storage, transport or fire	4
B.4.2	Procedures for destruction or decontamination.....	4
B.4.3	Emergency measures in case of an accident.....	4
B.4.4	References relied on	5

B.4 Further information

The entries refer to the data requirements as defined in Regulation (EU) No 283/2013. No new studies were submitted.

B.4.1 Methods and precautions concerning handling, storage, transport or fire

Hazards identification: None

On the basis of available information, laminarin is not expected to produce any significant adverse health or environmental effects when the recommended use instructions are followed.

Fire Fighting Measures:

Flash Point:	Not applicable (solid)
Hazardous Combustion Products:	Carbon monoxide (CO), Carbon dioxide (CO ₂)
Extinguishing Media:	All extinguishing agents usable (water spray or mist, foam, powders, CO ₂)
Unusual Fire and Explosion Hazards:	None
Fire Fighting Equipment:	Fire fighters and others exposed to products of combustion should wear chemical protection clothing and autonomous breathing equipment. Equipment should be thoroughly decontaminated after use.

Transport:

UN number:	Not regulated
UN proper shipping name:	Not regulated
Transport hazard class(es):	Not regulated
Packing group:	Not regulated
Environmental hazards:	None
Special precautions for user:	No additional information available

Handling & Storage: Good industrial practice in housekeeping and personal hygiene should be followed. Avoid contact with eyes, skin and clothing. When using do not eat, drink or smoke. Wash hands thoroughly after handling. Store only in original container.

B.4.2 Procedures for destruction or decontamination

Controlled incineration

As laminarine does not have a halogen content greater than 60%, pyrolytic behaviour under controlled conditions is not requested.

The recommended means of safe disposal is by controlled incineration at an approved chemical waste facility. This is a standard process and no further detailed instructions are required.

Others

Dispose of rinsed plastic packaging and cardboard in an authorized recycling plant.

B.4.3 Emergency measures in case of an accident

Avoid contact with the skin and eyes.

Use individual protection.

Limit and impound discharge.

Prevent entry into drains, waters or soil.

Do not water down. Collect with a neutral absorbent material and collect mechanically (sweep).
Do not reintroduce into original container; treat as a waste.

B.4.4 References relied on
