

CLARIFICATION N°1

Call for proposals: GP/EFSA/BIOHAW/2023/01

Call title: Support to EFSA in the risk assessment of alternative methods for the use and disposal of animal by-products and derived products

Question 1: The first question is about a document that the consortium partners have to sign authorising the applicant to sign the FPA. It is stated in the guide for applicants that there is a template provided by EFSA, but I have not been able to find it. Could you please provide this document to us?

Answer: Please note that the Draft Framework partnership agreement template used in case of award to a consortium (multi-beneficiaries) has now been published in the EFSA website under Corrigendum 1. This template includes Annex X, the mandate to be signed by each beneficiary in case of award to a consortium.

Question 2 The second question is about one document that is mentioned in the application submission checklist. Is the one that has to show the professional capacity of the consortium, providing references to reports/publications/patents/projects produced in the area, through PDF or hyperlink to the documents. Has this document to be an individual one or could it be included as a part of the technical proposal?

Answer: Ideally this document should be sent as a separate document as it is to be evaluated under the selection criteria. However, if it is part of the technical offer it can be accepted, as long as it clearly mentions that it is related to the evidence under selection criteria 2.4.B.
