CLARIFICATION N°2

Call reference: GP/EFSA/MESE/2022/01

Call title: NAMS4NANO: Integration of New Approach Methodologies results in chemical risk assessments: Case studies addressing nanoscale considerations.

Question:

For this project is possible to know:

- amount of financing;
- if co-financing is necessary;
- if it is possible to include another national University active in the field in our proposal as consortium partner

Answer:

- The amount of financing is:
for Lot 1: 300.000 euros
for Lot 2 and 3: foreseen up to a total of 5.000.000 euros with possibility to award several grants of 500.000 euros each covering one case study, or a higher amount in case of grants covering several case studies.
- The co-financing principle is not applicable principle for this type of grant.
- To be eligible, the applicant and in case of a consortium the partner/s must be on the list of competent organisations designated by the Member States in accordance with Article 36 of Regulation (EC) 178/2002 and Commission Regulation (EC) 2230/2004. In case the University you are referring to is not on the short list, it cannot be included as partner, but as subcontractor, then exclusively to execute ancillary tasks.
