NOTES TO THE FINANCIAL STATEMENTS

1.1.2015 – 31.12.2015

1. SIGNIFICANT ACCOUNTING POLICIES

1.1. Legal basis and Accounting rules

In accordance with Article 141 of Council Decision and Article 92 of the Financial Regulation of the European Food Safety Authority, the following annual accounts together with the reports on implementation of the budget of European Food Safety Authority have been drawn up.

These financial statements are prepared on the basis of the EU Accounting Rules as adopted by the Commission's Accounting Officer which adapt the International Public Sector Accounting Standards (and in some cases the International Financial Reporting Standards) to the specific environment of the EU, while the reports on implementation of the budget continue to be primarily based on movements of cash.

The accounting system of the European Food Safety Authority comprises general accounts and budget accounts. These accounts are kept in Euro on the basis of the calendar year. The budget accounts give a detailed picture of the implementation of the budget. They are based on the modified cash accounting principle.¹ The general accounts allow for the preparation of the financial statements as they show all charges and income for the financial year and are designed to establish the financial position in the form of a balance sheet as at 31 December.

The European Food Safety Authority financial statements have been drawn up using the methods of preparation as set out in the accounting rules laid down by the European Commission's Accounting Officer.

1.2. Accounting principles

The objectives of the financial statements are to provide information about the financial position, performance and cash flows of an entity that is useful to a wide range of users. For a public sector entity such as the European Food Safety Authority, the objectives are more specifically to provide information useful for decision making, and to demonstrate the accountability of the entity for the resources entrusted to it.

Article 95 of the Financial Regulation of the European Food Safety Authority sets out the accounting principles to be applied in drawing up the financial statements.

The overall considerations (or accounting principles) to be followed when preparing the financial statements are laid down in EU Accounting rule 2 and are the same as those described in IPSAS 1, that is:

Fair presentation

Financial statements shall present fairly the financial position, financial performance and cash flows of an entity. Fair presentation requires the faithful representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, revenue and expenses set out in EC accounting rules. The application of EC accounting rules, with additional disclosures when necessary, is presumed to result in financial statements that achieve a fair presentation (EU Accounting Rule 2).

¹ This differs from cash-based accounting because of elements such as carryovers.
European Food Safety Authority – Annual Accounts 2015

Accrual Basis

In order to meet their objectives, financial statements are prepared on the accrual basis of accounting. Under this basis, the effects of transactions and other events are recognised when they occur (and not as cash or its equivalent is received or paid) and they are recorded in the accounting records and reported in the financial statements of the periods to which they relate (EU Accounting Rule 2).

Going concern basis

When preparing financial statements an assessment of an entity's ability to continue as a going concern shall be made. Financial statements shall be prepared on a going concern basis unless there is an intention to liquidate the entity or to cease operating, or if there is no realistic alternative but to do so. These financial statements have been prepared in accordance with the going concern principle, which means that the European Food Safety Authority is deemed to have been established for an indefinite duration (EU Accounting Rule 2).

Consistency of presentation

According to this principle the presentation and classification of items in the financial statements shall be retained from one period to the next (EU Accounting Rule 2).

Aggregation

Each material class of similar items shall be presented separately in the financial statements. Items of a dissimilar nature or function shall be presented separately unless they are immaterial (EU Accounting Rule 2).

Offsetting

Assets and liabilities, and revenue and expenses, shall not be offset unless required or permitted by an EU Accounting rule (EU Accounting Rule 2).

Comparative Information

Except when an EU accounting rule permits or requires otherwise, comparative information shall be disclosed in respect of the previous period for all amounts reported in the financial statements. When the presentation or classification of items in the financial statements is amended, comparative amounts shall be reclassified unless the reclassification is impracticable (EU Accounting Rule 2).

1.3. Statement of financial performance

1.3.1. Revenue

Non-exchange revenue makes up the vast majority of EFSA revenue and includes mainly EU subsidy and own resource amounts.

Exchange revenue is the revenue from the sale of goods and services. It is recognised when the significant risk and rewards of ownership of the goods are transferred to the purchaser. Revenue associated with a transaction involving the provision of services is recognised by reference to the stage of completion of the transaction at the reporting date.

Interest income consist of received bank interest.

1.3.2. Expenses

According to the principle of accrual-based accounting, the financial statements take account of expenses relating to the reporting period, without taking into consideration the payment date; meaning when the goods or services are used or consumed.

Exchange expenses arising from the purchase of goods and services are recognised when the supplies are delivered and accepted by EFSA. They are valued at original invoice cost.

Non-exchange expenses account for the majority of EFSA's expenses. They relate to transfers to beneficiaries and can be of three types: entitlements, transfers under agreement and discretionary grants, contributions and donations.

Transfers are recognised as expenses in the period during which the events giving rise to the transfer occurred, as long as the nature of the transfer is allowed by regulation (Financial Regulation, Staff Regulations, or other regulation) or a contract has been signed authorising the transfer; any eligibility criteria have been met by the beneficiary; and a reasonable estimate of the amount can be made.

When a request for payment or cost claim is received and meets the recognition criteria, it is recognised as an expense for the eligible amount. At year-end, incurred eligible expenses due to the beneficiaries but not yet reported are estimated and recorded as accrued expenses.

2. NOTES TO THE BALANCE SHEET

NON-CURRENT ASSETS

The tangible or intangible items acquired whose acquisition price or production cost is 420.00 euro or more, with a period of use greater than one year and which are not consumables, are recorded as fixed assets. Items with an acquisition price below 420.00 euro have been reflected in the accounts as running expenses.

Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life (EU Accounting Rule 7).

The depreciation is calculated using the straight-line method with the following rates:

Type of asset	Straight line depreciation rate
Computer software	25%
Furniture	25% - 10%
Plant and equipment	25% - 12.5%
Computer hardware	25%
Telecommunication and audio-visual equipment	25%
Building	4%

2.1. Intangible assets

Intangible assets are identifiable non-monetary assets without physical substance. Acquired computer software licences are stated at historical cost less accumulated amortisation and impairment losses. The assets are amortised on a straight-line basis over their estimated useful lives. The estimated useful lives of intangible assets depend on their specific economic lifetime or legal lifetime determined by an agreement.

Currently, EFSA uses 25% amortisation rate for its intangible assets. Amortisation is the systematic allocation of the depreciable amount of an intangible asset over its useful life (EU Accounting Rule 6). Internally developed intangible assets are capitalised when the relevant criteria of the EU Accounting rules are met. The costs capitalisable include all directly attributable costs necessary to create, produce, and prepare the asset to be capable of operating in the manner intended by management. Costs associated with research activities, non-capitalisable development costs and maintenance costs are recognised as expenses as incurred

The intangible fixed assets at EFSA consist of computer software and the development cost of the intangible fixed assets under construction.

During 2015, Open ScaIE and Matrix were de-prioritised and will be resumed in 2016. Talent Management project continued the development phase which had a cost of 878,380.00 euro, some modules are foreseen to be released in 2016 although the application will be fully operational in 2018.

Below the aggregate information breakdown of the intangible fixed assets under construction and their associated development cost:

The amount of research and development expenditure related to IT projects in the course of 2015 was 447,934.55 euro and 878,380.00 euro, respectively.

2.2. Property, plant and equipment

All property, plant and equipment are stated at historical cost less accumulated depreciation and impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition or construction of the asset. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits or service potential associated with the item will flow to EFSA and its cost can be measured reliably. Repairs and maintenance costs are charged to the statement of financial performance during the financial period in which they are incurred.

Tangible (fixed) assets at EFSA consist mainly of the building (EFSA Seat), technical equipment, furniture, computer hardware, telecommunication and audio-visual equipment.

Land and buildings includes the amounts related to the cost of EFSA Seat delivered in December 2011. The land has been donated by the Parma Municipality to EFSA, free of charge, allowing EFSA to use the land for indefinite period of time. No accounting entries for this non-exchange component – Land. The cost of the building have been registered for 39,474,078.04 euro.

These payments are made before the goods are delivered or the services are performed and intended to provide the beneficiary with a float. If the beneficiary does not incur eligible expenditures, he has the obligation to return the pre-financing advance to EFSA. This right of EFSA is shown as an asset.

The PMO's mission is to manage the financial rights of permanent, temporary and contractual staff working at the Commission, to calculate and to pay their salaries and other financial entitlements. The PMO provides these services to other EU institutions and agencies/authorities as well. The PMO is also responsible for managing the health insurance fund of the Institutions, together with processing and paying the claims of reimbursement from staff members. The PMO also manages the pension fund and pays the pensions of retired staff members. PMO is being audited by the European Court of Auditors. The Authority is only responsible for the communication to the PMO of reliable information allowing the calculation of the staff costs. It is also responsible to check that this information has been correctly handled in the monthly payroll report used for accounting payroll costs. It is not responsible for the calculation of the payroll costs performed by PMO.

4. CONTINGENT ASSETS AND LIABILITIES AND OTHER SIGNIFICANT DISCLOSURES

4.1. Contingent Assets

A contingent asset is a possible asset that arises from past events and of which the existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of EFSA. It is not recognised because the amount of the obligation cannot be measured with sufficient reliability. A contingent asset is disclosed when an inflow of economic benefits or service potential is probable.

5. PROTECTION OF THE EFSA's BUDGET

5.1. Recoveries

Under direct management, and in accordance with the Financial Regulation, recovery orders should be established by the authorising officer for amounts unduly paid. Recoveries are then implemented by direct bank transfer from the debtor (e.g. a supplier) or by offsetting from other amounts that EFSA owes to the debtor. The Financial Regulation foresees additional procedures to ensure the collection of recovery orders overdue, which are the object of a specific follow up by the Accounting Officer of EFSA.

5.2. Preventive mechanisms

In addition to the corrective mechanisms mentioned above, EFSA uses a number of preventive mechanisms to protect the EU budget. Under direct management, preventive actions include checks made on eligibility of expenditure being claimed by beneficiaries. These ex ante controls are intended to provide reasonable assurance on the legality and regularity of expenditure being paid. EFSA can also provide guidance, particularly on contractual issues, with the aim of ensuring a sound and efficient management of funding and therefore a lower risk of irregularities.

6. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT POLICIES

Financial instruments comprise cash, current receivables and recoverables, current payables, amounts due to and from consolidated entities. Financial instruments give rise to liquidity, credit, interest rate and foreign currency risks, information about which and how they are managed is set out below.

The carrying amounts of financial instruments are as follows:

Liquidity risk

Liquidity is the risk that arises from the difficulty of selling an assets; for example, the risk that a given security or asset cannot be traded quickly enough in the market to prevent a loss or meet an obligation. Liquidity risk arises from the ongoing financial obligations, including settlement of payables.

The table below provides details on EFSA liabilities and their contractual maturities:

31 December 2015	< 1 year	1-5 years	> 5 years	Total
Payables–Long term liabilities	881,722.78	4,730,635.76	21,151,543.03	26,763,901.57
Current payables	1,987,857.86	0.00	0.00	1,987,857.86

Total liabilities	10,177,463.72	4,730,635.76	21,151,543.03	36,059,642.51

Regarding treasury, bank accounts opened in the name of EFSA are not overdrawn. Treasury and payment operations are highly automated and rely on modern information systems. Specific procedures are applied to guarantee system security and to ensure segregation of duties in line with the Financial Regulation, the internal control standards, and audit principles. EFSA's budget principles ensure that overall cash resources for a given year are always sufficient for the execution of all payments. In order to ensure that available treasury resources are always sufficient to cover the payments to be executed in a given month, procedures regarding cash forecasting are in place.

Credit risk

Credit risk is the risk of loss due to a debtor's non-payment or other failure to meet a contractual obligation. The default events include a delay in repayments, restructuring of borrower repayments and bankruptcy.

Treasury resources are kept with a commercial bank. The subsidy to EC (DG SANTE) as per agreement is requested 7 times a year and is based on cash forecasts. Minimum cash levels, are kept in the main bank account and as a consequence the monthly average bank balance is 9.7 million euro to ensure that EFSA risk exposure is limited. This amounts should be viewed with regard to the overall treasury balances which fluctuated in 2015 between 1.2 million euro and 23.7 million euro. In addition, specific guidelines are applied for the selection of commercial banks in order to further minimise counterparty risk to which EFSA is exposed. EFSA commercial bank has been selected by call for tenders and the credit ratings of the commercial bank where EFSA has bank accounts is reviewed regularly.

Prefinancing payments are only made to suppliers/contractors if they satisfy EFSA's minimum financial and capacity requirements.

The maximum exposure to credit risk is:

Interest rate risk

EFSA earn interest on bank accounts balances. EFSA has put in place measures to ensure that interest earned on its bank accounts regularly reflects market interest rates, as well as their possible fluctuation. Overnight balances held on the commercial bank accounts earn interest on a daily basis but are paid to EFSA on a quarterly basis. The bank accounts held by EFSA have associated for interest calculation the ECB marginal rate for its main refinancing operations. As a result no risk exists that EFSA earns interest at rates lower than market rates. EFSA has financial liabilities on short and long term associated to the reimbursement of the building purchased (EFSA Seat) in 2011, the interest rate associated is fixed not variable.

Foreign currency risk

All financial assets and liabilities are in EUR, therefore EFSA has no currency exposure. When miscellaneous receipts are received in currencies other than EUR, are converted into EUR and transferred to accounts held in EUR. All bank accounts held by EFSA are in EUR, no material foreign currency risk with regard to these assets.

7. CHANGES IN ACCOUNTING POLICIES

There have been no changes in accounting policies for the financial year 2015.

At the date of issue of the accounts, no material issue came to the attention of the Accounting officer of European Food Safety Authority or were reported to him that would require separate disclosure under that section.

REPORTS ON IMPLEMENTATION OF THE BUDGET OF EUROPEAN FOOD SAFETY AUTHORITY

BUDGETARY STRUCTURE AND PRINCIPLES

The budgetary accounts are kept in accordance with the Financial Regulation and its rules of application. The budget is the instrument which, for each financial year, forecasts and authorises the revenue and expenditure considered necessary for the implementation of EFSA's founding regulation.

Every year, EFSA estimates its revenue and expenditure for the year and draws up a draft budget which it sends to the Commission. The Commission then sends it to the budgetary authority. On the basis of this draft budget, the Council draws its position which is then the subject of negotiations between the two arms of the budgetary authority. The President of the Parliament declares that the joint draft has been finally adopted, thus making the budget enforceable. The task of executing the budget is the responsibility of EFSA.

The budget structure for EFSA consists of administrative and operational appropriations and has not only non-differentiated appropriations as well as differentiated appropriations, meaning that the commitment and the payment appropriations might not have the same amount. Non-differentiated appropriations are used to finance operations of an annual nature (which comply with the principle of annuality) while differentiated appropriations are used to finance multi-annual operations.

Origin of Appropriations

The main source of appropriations is EFSA budget for the current year. However, there are other types of appropriations resulting from the provisions of the Financial Regulation. They come from previous financial years or outside sources:

- **Initial budget appropriations** adopted for the current year can be supplemented with transfers between lines and by amending budgets.
- **Appropriations carried over** from previous year or made available again also supplement the current budget.
- **Assigned revenue** which can be a revenue made up of refunds where the amounts allocated on the budget line which incurred the initial expenditure and may be carried over for one year only or a revenue such as contributions from Member States.

Composition of Appropriations Available

- Initial budget = appropriations voted in year N-1;
- Final budget appropriations = initial budget appropriations adopted + amending budget appropriations + transfers + additional appropriations;
- Additional appropriations = assigned revenue (see above) + appropriations carried over from the previous financial year.

Calculation of the Budget Result

The revenue entered in the accounts is the amount actually received during the course of the year. For the purposes of calculating the budget result for the year, expenditure comprises payments made against the year's appropriations plus any of the appropriations for that year that are carried

over to the following year. Payments made against the year's appropriations means payments that are made by the accounting officer by 31 December of the financial year.

The following are added to or deducted from the resulting figure:

- the net balance of cancellations of payment appropriations carried over from previous years and any payments which, because of fluctuations in the euro rate, exceed non-differentiated appropriations carried over from the previous year; and
- the balance of exchange-rate gains and losses recorded during the year.

Payment appropriations carried over include: automatic carryovers and carryovers by decision. The cancellation of unused payment appropriations carried over from the previous year shows the cancellations on appropriations carried over automatically and by decision. It also includes the decrease in assigned revenue appropriations carried over to the next year in comparison with 2013.

Budgetary principles

The economic result of the year is calculated on the basis of accrual accounting principles. The budget result is however based on modified cash accounting rules, in accordance with the Financial Regulation. As the economic result and the budget result both cover the same underlying operational transactions, it is a useful control to ensure that they are reconcilable.

The actual budgetary revenue for a financial year corresponds to the revenue collected from entitlements established in the course of the year and amounts collected from entitlements established in previous years. Therefore the entitlements established in the current year but not yet collected are to be deducted from the economic result for reconciliation purposes as they do not form part of budgetary revenue. On the contrary the entitlements established in previous years and collected in current year must be added to the economic result for reconciliation purposes.

The net accrued expenses mainly consist of accruals made for year-end cut-off purposes, i.e. eligible expenses incurred by beneficiaries of EU funds but not yet reported to EFSA. While accrued expenses are not considered as budgetary expenditure, payments made in the current year relating to invoices registered in prior years are part of current year's budgetary expenditure.

The net effect of pre-financing is the combination of (1) the new pre-financing amounts paid in the current year and recognised as budgetary expenditure of the year and (2) the clearing of the prefinancing paid in current year or previous years through the acceptance of eligible costs. The latter represent an expense in accrual terms but not in the budgetary accounts since the payment of the initial pre-financing had already been considered as a budgetary expenditure at the time of its payment.

Besides the payments made against the year's appropriations, the appropriations for that year that are carried to the next year also need to be taken into account in calculating the budget result for the year. The same applies for the budgetary payments made in the current year from carry-overs and the cancellation of unused payment appropriations.

The movement in provisions relates to year-end estimates made in the accrual accounts (employee benefits mainly) that do not impact the budgetary accounts. Other reconciling amounts comprise different elements such as asset depreciation, asset acquisitions, capital lease payments and financial participations for which the budgetary and accrual accounting treatments differ.
