

# PROGRESS REPORT

Management Board Meeting  
15 June 2016

# Scientific outputs

## Contaminants in vegetable oils and foods

Glycerol-based products contain contaminants found in palm oil, but also in other vegetable oils, margarines and spreads. These contaminants are found in all young age groups, and for high consumers in all age groups.

> Story

> Video

- Process contaminants in vegetable oil and food
- Apricot kernels
- Xylella fastidiosa*
- Uncertainty in scientific assessment
- Rapid outbreak assessment on HUS associated STEC in Romania and Italy
- Non-monotonic dose response

# Renewal of ANS and CEF Scientific Panels

**EFSA seeks members for two Scientific Panels**

EFSA has launched a call to renew membership of two of its Scientific Panels: the Panel on Food Additives and Nutrient Sources Added to Food (ANS) and the Panel on Food Contact Materials, Enzymes, Flavourings and Processing Aids (CEF). The deadline for applications is 30 June 2016.

> Story      > Call details      > Selection process
