Legislation on *Listeria monocytogenes* in RTE foods

*Listeria* stakeholder meeting  
19-20 September 2017  
Parma

Pamina M. Suzuki  
Unit G4 - Food hygiene  
Directorate G - Crisis management in food, animals and plants  
DG Health and Food Safety (DG SANTE)
EU food law - microbiological hazards: preventive approach

Food Hygiene Legislation

- Reg. 178/2002
- Reg. 852/2004
- Reg. 853/2004
- Reg. 854/2004
- Reg. 882/2004
- Reg. 2073/2005
- ...

Zoonoses Regulation

- Reg. 2160/2003
- Control salmonella and other specified zoonotic agents
- National Control Programmes and targets

Zoonoses Directive

- Monitoring and reporting
- Zoonotic agents
- Foodborne outbreaks
- AMR

Reg. 183/2005

Feedstuffs
Microbiological testing alone can never guarantee the safety of the foodstuff tested.

The safety of foodstuffs is principally ensured by a structured preventive approach (HACCP, GHP, ...)

EU food law - microbiological hazards: preventive approach
Reg. (EC) No 2073/2005 – microbiological criteria

- Article 4 Regulation (EC) No 852/2004
- **Tool** to be used by FBO
- Criteria established in **support of Food Hygiene Legislation**
- The use of microbiological criteria should form an integral part of the implementation of **HACCP-based procedures** and other hygiene control measures
Obligations for the FBO

- demonstrate compliance with microcriteria
  - durability, challenge studies (Art 3(2), Annex II)
- establish a sampling and testing scheme based on risk
- respond in case of non-compliance
- follow and assess trends
Obligations for the Competent Authority

- **verify** that FBO’s **comply** with rules and criteria
- is entitled to undertake **further sampling** and analysis
- In the light of results – take any **appropriate measures**
MAIN OBJECTIVES:

✓ To ensure a high level of human health protection

✓ To harmonise microbiological criteria

✓ Uniform rules for food business operators
### Microbiological criteria

- Reference methods to guarantee a uniform application and control of legislation in EU

#### Food safety criteria

- Defines the acceptability of the product/butch
- Applicable to products placed on the market
- Applicable to intra-EU trade and to imported products from third countries

- Action: withdrawal/recall

#### Process hygiene criteria

- Indicates the acceptable functioning of the production process
- Applicable only during the production process, not to products placed on the market

- Action: improvement of production hygiene, selection of raw materials
Reg. (EC) No 2073/2005 – microbiological criteria

Annex I:
1. Chapter 1: Food Safety Criteria
2. Chapter 2: Process Hygiene Criteria
3. Chapter 3: Rules for sampling and preparation of test samples
L. monocytogenes food safety criteria

The SCVPH issued at the same time a separate opinion on Listeria monocytogenes. That opinion recommended that it be an objective to keep the concentration of Listeria monocytogenes in food below 100 cfu/g. The Scientific Committee on Food (SCF) agreed with these recommendations in its opinion of 22 June 2000.

Ready-to-eat food (RTE):

(g) ‘ready-to-eat food’ means food intended by the producer or the manufacturer for direct human consumption without the need for cooking or other processing effective to eliminate or reduce to an acceptable level micro-organisms of concern;
RTE food unable to support the growth of *L. monocytogenes*:

- Products with $\text{pH} \leq 4.4$ or $a_w \leq 0.92$
- Products with $\text{pH} \leq 5.0$ and $a_w \leq 0.94$
- Products with a *shelf-life of less than 5 days*
- *Other* categories of products can also belong to this category, subject to *scientific justification*. 
Ready to Eat food (RTE)?

No

No FSC (Food Safety Criteria)

Yes

RTE intended for infants or special medical purposes?

No

Yes

FSC 1.1
(n=10; c=0; m= Abs in 25g; during shelf-life)

RTE unable to support the growth?

No

Yes

FSC 1.3
(n=5; c=0; m= 100 cfu/g; during shelf-life)

RTE able to support the growth: is the shelf life < 5 days?

No

Yes

FSC 1.2a (n=5; c=0; m= 100 cfu/g; during shelf-life)

RTE able to support the growth: is the manufacturer able to demonstrate that the RTE will not exceed 100 cfu/g throughout the shelf-life?

No

Yes

FSC 1.2b (n=5; c=0; m= Absence in 25 g; Before the food has left the immediate control of the FBO, who has produced it)
Environmental sampling

Article 5.2 of Regulation (EC) No 2073/2005:

2. Samples shall be taken from processing areas and equipment used in food production, when such sampling is necessary for ensuring that the criteria are met. In that sampling the ISO standard 18593 shall be used as a reference method.

Food business operators manufacturing ready-to-eat foods, which may pose a *Listeria monocytogenes* risk for public health, shall sample the processing areas and equipment for *Listeria monocytogenes* as part of their sampling scheme.
Thank you very much for your attention!

Questions?!
