NETWORK OF EXCELLENCE ON FOOD NANOTECHNOLOGY (food) E-

9

Funded by:

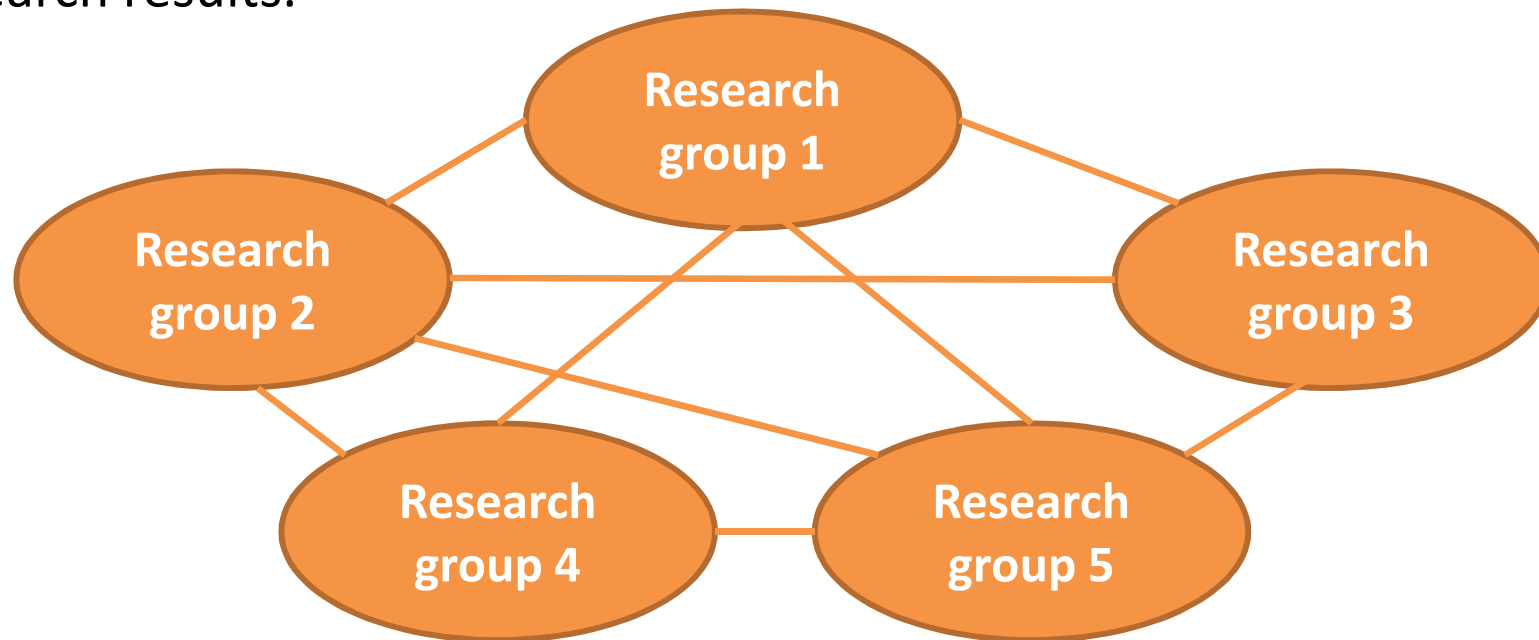

MINISTERIO
DE ECONOMÍA, INDUSTRIA
Y COMPETITIVIDAD

(Food)E⁻⁹

Is a **network of excellence** founded by the Spanish Government to improve research results.

***Excellence:** Founder research groups must have participated in a research project founded in previous calls of the Spanish National Plan of Research.

Area:

(food)E⁻⁹

Nano

España

Food

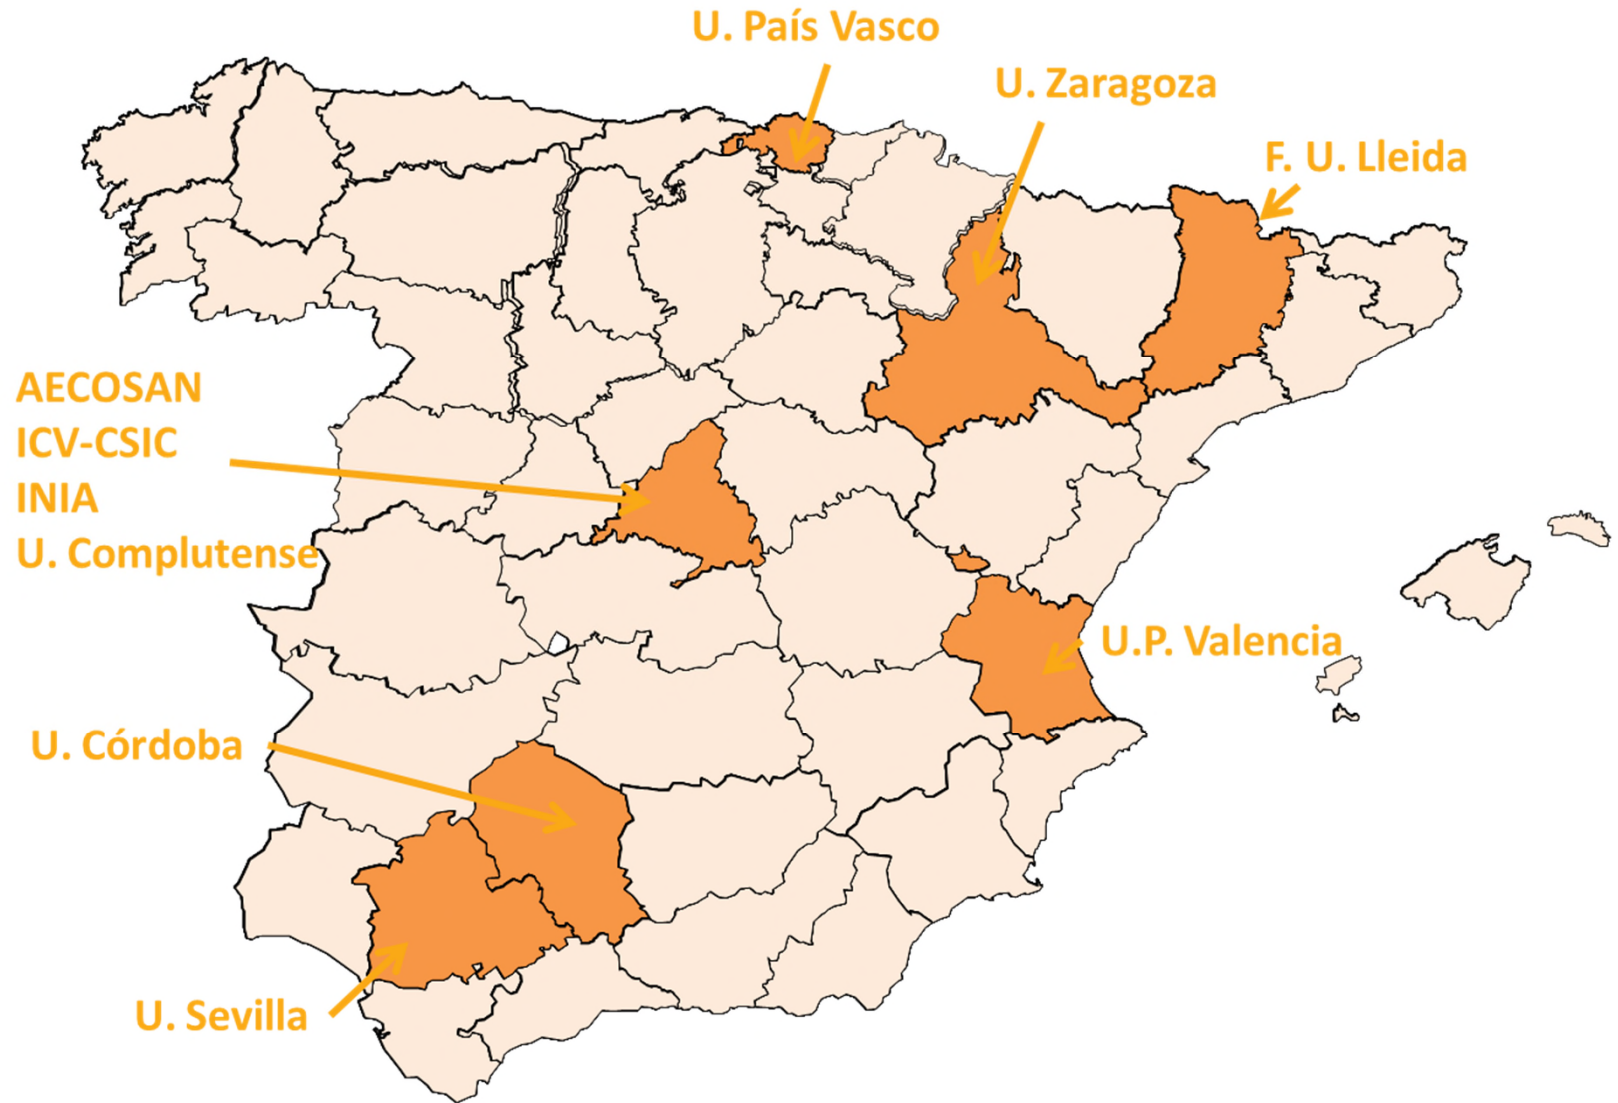

What is (Food)E-9

(Food)E⁻⁹ is a network of professionals (researchers, teachers, managers, ...) joined in a collaborative space of **research**, **dialogue** and **reflection** on how **nanotechnology** can support the food industry and what the associated main risks may be.

Our aim

Strengthen the **capacities** and **available** resources from a comprehensive point of view that includes both, the **applications of nanotechnology** in food, and the legal, analytical, environmental and toxicological aspects derived from its use.

Founder members

Actions of (Food)E⁻⁹

- 1. Promoting cutting-edge research among members**
- 2. Promoting specialised training in the field of food nanotechnology.**
- 3. Promoting scientific dissemination about food nanotechnology.**
- 4. Promoting technology transfer.**

Budget for the coordination actions

20.000€ / 2 years
