

.....

Hepatitis E virus workshop in Policy and Science

Our goals:

- * Identify ***Scientific areas for cooperation***: to identify and fill evidence gaps through research cooperation.
- * Identify ***Policy options and their implications***: to mitigate any risk to health and better protect consumers from the consumption of pork products.
- * Encourage ***knowledge sharing*** between MS with the aim of building networks of communication and collaboration between policy/decision makers and scientists to have a more efficient decision-making process.
