ADVISORY FORUM AND SCIENTIFIC COOPERATION

AMENDMENTS TO THE ARTICLE 36 LIST OF ORGANISATIONS

SUMMARY

Commission Regulation (EC) No 2230/2004¹ stipulates that the “*Authority’s Management Board, acting on a proposal from the Executive Director, shall draw up the list of competent organisations*” (Art.2 (2)). In accordance, new designations of competent organisations to be included on the Article 36 list, as well as substantial changes to organisations already on the list, need to be endorsed by the Management Board.

A designation is described in the document that follows.

The Management Board is informed of the withdrawal of two organisations from the Article 36 list.

In addition, and in accordance with the Management Board decision of 18 December 2008, the Management Board must also be informed of technical changes adopted with decisions dated 29/08/2013 and 09/10/2013. Technical changes are summarised in Annexes II and are reflected in the revised list presented in Annex I.

The revised Article 36 list of competent organisations, including all changes, is presented for the adoption of the Management Board in Annex I.

¹ Commission Regulation (EC) No 2230/2004 of 23 December 2004 laying down detailed rules for the implementation of European Parliament and Council Regulation (EC) No 178/2002 with regard to the network of organisations operating in the fields within the European Food Safety Authority’s mission (OJ L 379, 24.12.2004, p. 64–67)

ADVISORY FORUM AND SCIENTIFIC COOPERATION

AMENDMENTS TO THE ARTICLE 36 LIST OF ORGANISATIONS

The Article 36 list was initially drawn up by the Decision of the Management Board of 19 December 2006 following the procedure set out in Commission Regulation (EC) 2230/2004; the list is regularly reviewed by the Member States for new designation proposals, deletions and changes to existing organisations.

I. New designations for the Article 36 list

The Permanent Representation of the United Kingdom has officially notified EFSA of a new designation proposal for the Article 36 list for the following competent organisation:

- **The James Hutton Institute**, a research organisation. The annual budget includes 40% from non-governmental sources. They indicate further: “The 40% of non-governmental funding is typically split evenly on an annual basis from public e.g. European funding and private e.g. industry sources”.

EFSA has screened the new designation proposal in order to ensure that they comply with the criteria set out in Article 1(1) of Commission Regulation 2230/2004². Following this screening, the designated organisation was found to meet all the criteria and is therefore considered to be eligible for inclusion in the Article 36 list.

II. Technical changes and withdrawals

The Management Board is kindly requested to note that the following organisation listed below were predecessors to the newly designated “The James Hutton Institute” and are withdrawn from the Article 36 list upon request of the Permanent Representation of the United Kingdom:

- Entry no. 2. Biomathematics and Statistics Scotland
- Entry no. 35. Scottish Crop Research Institute.

The Board is also informed of the technical changes adopted by the Executive Director in her Decision dated 29/08/2013 (Annex II) and the Deputising Executive Director in his Decision dated 09/10/2013 (Annex III).

II. Conclusion

The Board is requested to approve the updated Article 36 list of competent organisations (Annex I) after adding the designated organisation by the United Kingdom to list.

² The criteria the designated organisations have to meet can be described as follows:

- A) They must “carry out scientific and technical support tasks in the fields within the mission of the European Food Safety Authority”;
- B) They must be “legal entities pursuing public interest objectives” and be able to ensure that the “tasks entrusted to them by the Authority will be performed with independence and integrity”;
- C) They must “possess a high level of scientific or technical expertise in one or several fields within the Authority’s mission”;
- D) They must “have the capacity to operate in a network on scientific actions”.

With regards to the criterion B, designations have been considered to be “legal entities pursuing public interest objectives” if the organisations fall into the following categories:

- Public/ Governmental organisations and Foundations;
- Universities (including Associated organisations);
- Certified public interest organisations (e.g.: charities, organisations empowered with statutory duties).

Art. 36 of Regulation EC 178/2002 and Art. 1 of Regulation EC 2230/2004
