

AGES / AUSTRIA

Klaus Leder

Austrian Agency for Health and Food Safety GmbH

ORGANISATIONAL STRUCTURE

- Institute for Plant Protection Products
- ~60 heads
- PPP evaluation
- AS (NAS & EAS) evaluation
- Drafting Authorisation for BAES (the legal body)
- Market control
- No Bocides (UBA)

PROCESS OVERVIEW ACTIVE SUBSTANCE

- Describe the current process for in your country / organisation for the approval of active substances
- In particular focus on the different steps related to the dossier and it's content
 - e.g. receipt and technical completeness checks, handling confidentiality claims and the sanitisation process, requesting additional information and communication with the applicant, renewal with multiple applicants, what type of reports do you create, how do experts extract and use data for assessment, how do you work with co-rapporteurs

We will use this information to define the activities that will be included in the pilot, in particular we need to focus on process steps common to all RMS

PROCESS OVERVIEW FOR PLANT PROTECTION PRODUCT

Describe the current process for in your country / organisation for the authorisation of plant protection products

- In particular focus on the different steps related to the dossier and it's content
- How do you handle the dossier supporting an MRL application?
- How does it differ from the approval process?
- Would you like to test IUCLID for PPP authorisation? Which steps in the process would you like to test?

IT SOLUTIONS USED FOR PPP APPROVAL / AUTHORISATION

PLANTeOS (**P**lantprotectionproduct **O**rganisation **S**ystem)

Organisation of internal Workflow / also the basis for the list of registered products

POINTS FOR DISCUSSION

- Highlight any points you would like to discuss with the technical committee
