Question Enterprise Keywords FAQ Category Answer

FAQ Category : Data Model (2)

Is E.01 sampMatType mandatory or optional in ChemMon reporting?

Data Model

The element E.01: sampMatType was previously mandatory. [This element is to be optional for ChemMon](#)

Why is resLOQ a mandatory element in the Chemical Monitoring Data Guidelines?

resLOQ
CHemMon Guidelines

Data Model

In the harmonised chemical monitoring data collection guidelines (SSD2) on page 29 M.05 resLOQ is

FAQ Category : Data Submission (5)

Which PARAM hierarchy should be used for reporting?

Data Submission

When reporting results for Chemical Monitoring, please use the

nical-monitoring-data-network

Answer

In the harmonised chemical monitoring data collection guidelines (SSD2) on page 29 M.05 resLOQ is a mandatory element although in previous data collections e.g. VMPP, it was dependent mandatory. Since this has been identified as difficult for some data providers, the XSD has been modified so absence of resLOQ in a data transmission will remain as a warning for 2018 data collection and will become an error from 2019.

Since resLOQ is useful when handling left censored data in exposure assessments this is something we would like to achieve although it may not be fully possible for all data providers in 2018 data transmissions.

Hi David,
due to the fact that the schema is allowing both the simplified syntax (sampMatCode.base) and the standard syntax (sampMatCode as compound field) it isn't possible to make sampMatCode mandatory in the schema because either the first syntax is used or the second one. And similarly for the other compound fields.

Also available simplified XSD which can make diagnosing XML validation issues a little bit simpler

Early Issue Detection

- MS are encouraged to submit data by the end of June
- July supported data validation service
- Acceptance DWH – available after validation phase
