

# Conclusions

- Different implementation (enforcement) of Regulation 1/2005 in EU MS (useful for the Commission Report).
- EFSA SO to consider new evidence/data since 2004 on each section of Annex I of Regulation 1/2005
- Old data not considered in Regulation 1/2005 not to be included in the EFSA SO: "not second try: the Commission already have the information".
- Animal-based measurable indicators should be developed. Only consider WI which can be used in practice for veterinarians and inspectors.
- Recommendations on possible changes of Regulation 1/2005 will be drawn (if new scientific evidence).
- Any new scientific data are welcome !!!.
