

Management Board
24 June 2021

Decision of the Management Board on Networks

Dirk Detken

Head of Unit
Legal and Assurance Services

Trusted science for safe food

- The changes introduced by the Management Board were supported by the Advisory Forum.
- Some further sophistication of certain provisions was proposed.
- Positive observations were received regarding the overall updated governance of EFSA networking activities.
- Interaction between MB and AF paramount

- Before the Management Board takes its final decision whether to continue or discontinue a network, the Advisory Forum should be able to put forward its viewpoint by issuing a non-binding recommendation in this respect.

- The limitations on the number of network participants and alternate participants should be removed. Removing this limit would facilitate a broader pool of scientific expertise within each network and therefore a smoother operation of the networks.
